

Reforesting Austin's Parks and Riparian Zones Monitoring Report for Planting Projects

Project Name: Reforesting Austin's Parks and Riparian Zones

Project Type and Design (*single tree dispersed, single tree canopy, forest canopy*): Davis White and Patterson (PARD) Single Tree Plantings and Onion Creek (WPD) Canopy Planting

Project Location (*city, town, or jurisdiction*): City of Austin, TX

Project Operator Name: TreeFolks

Deadline to Submit to Registry (*annually from the date of the first Verification Report*): August 26, 2021

1. **Has the contact info for the Project Operator changed? If so, provide new contact info.**

N/A

2. **Have there been changes in land ownership of the Project Area?**

N/A

3. **Have there been any changes in the Project Design?**

N/A

4. **Have there been any changes in the implementation or management of the Project?**

N/A

5. **Have there been any significant changes to the site (such as flooding or human changes)?**

A severe *Winter Storm Uri* with unusual freezing temperatures in February of 2021 impacted many trees in Central Texas, including a small portion of the trees in this project.

6. **Have there been any significant tree or canopy losses?**

The most significantly affected trees at Davis White park were the *Acacia farnesiana* and *Platanus mexicana*. All 3 *Acacia farnesiana* [DW 17, DW 18, DW 19] and 1 *Platanus mexicana* [DW 20] died back and had root sprouts when a site visit was conducted on Monday, April 20, 2021. Another 2 trees remain dead and have not been replaced *Cercis canadensis* var. *texensis* [DW12] and *Ungnadia speciosa* [DW 25].

At Patterson Park, we found 1 Rootsprout tree that had previously died back, *Cercis canadensis* var. *texensis* [PAT7] and 1 Dead tree that has not replaced *Sophora secundiflora* [PAT12].

7. Any other significant elements to report?

N/A
