INSTRUCTIONS

Project Operators must complete and submit this Project Design Document (PDD) to request credits. City Forest Credits (CFC) then reviews this PDD as part of the validation process along with all other required project documents. An approved third-party verifier then conducts verification.

The Protocol Requirements below are a list of eligibility requirements for informational purposes which are also found in the CFC Tree Preservation Protocol Version 11.40, dated February 7, 2022.

Project Operators will enter data and supporting attachments starting on page 6 under Project Overview where you find “[Enter text here]” as thoroughly as possible and provide numbered attachments for maps and other documentation (ex: 1 – Regional Map).

PROTOCOL REQUIREMENTS

Project Operator (Section 1.1)

Identify a Project Operator for the project. This is the entity or governmental body who takes responsibility for the project for the 40-year duration.

Project Duration and Project Implementation Agreement (Section 1.2, 2.2)

Project Operator must commit to a 40-year duration and sign a Project Implementation Agreement. This is a 40-year agreement between the Project Operator and City Forest Credits (the “Registry”) for an urban forest carbon project.

Location Eligibility (Section 1.3)

Projects must be located in or along the boundary of at least one of the following criteria:

- A. “Urban Area” per Census Bureau maps; see <https://www.census.gov/geographies/reference-maps/2010/geo/2010-census-urban-areas.html>
- B. The boundary of any incorporated city or town created under the law of its state.
- C. The boundary of any unincorporated city, town, or unincorporated urban area created or designated under the law of its state.
- D. The boundary of any regional metropolitan planning agency or council established by legislative action or public charter. Examples include the Metropolitan Area Planning Council in Boston, the Chicago Municipal Planning Agency, the Capital Area Council of Governments (CAPCOG) in the Austin area, and the Southeastern Michigan Council of Governments (SEMCOG)
- E. The boundary of land owned, designated, and used by a municipal or quasi-municipal entity for source water or watershed protection. Examples include Seattle City Light South Fork Tolt River Municipal Watershed (8,399 acres owned and managed by the City and closed to public access);
- F. A transportation, power transmission, or utility right of way, provided the right of way begins, ends, or passes through some portion of A through D.

Ownership or Right to Receive Credits Eligibility (Section 1.5)

Project Operator must demonstrate ownership of property and eligibility to receive potential credits by meeting one of the following:

- A. Own the land and potential credits upon which the Project trees are located; or

- B. Own an easement or equivalent property interest for a public right of way within which Project trees are located and accept ownership of those Project trees by assuming responsibility for maintenance and liability for them; or
- C. Have a written and signed agreement from the landowner, granting ownership to the Project Operator of any credits for carbon storage, other greenhouse gas benefits, and other co-benefits delivered by Project trees on that landowner’s land. If the Project Area is on private property, the agreements in this subsection must be recorded in the public records in the county where the property is located. The recordation requirement can be satisfied if the agreements specified in this subsection are contained in a recorded easement, covenant, or deed restriction on the property.

Demonstrate Tree Preservation (Section 4.1)

The Project Operator must show that the trees in the Project Area are preserved from removal by a recorded easement, covenant, or deed restriction (referred to hereafter as “Recorded Encumbrance”) with a term of at least 40 years. This action is referred to as the “Preservation Commitment.” This Recorded Encumbrance must be recorded not later than 12 months after Registry approval of the Project’s Application.

Demonstrate Threat of Loss (Section 4.2, 4.3, and 4.4):

The Project Operator must show that prior to the Preservation Commitment:

- Project trees were not preserved from removal through a Recorded Encumbrance or other prohibitions on their removal,
- The Project Area was:
 - In a land use designation that allowed for at least one non-forest use. Non-forest uses include industrial, commercial, transportation, residential, agricultural, or resource other than forest, as well as non-forest park, recreation, or open space uses.
 - Is not in an overlay zone that prohibits all development. Examples include critical areas or wetland designations.
- The Project Area met one of the following conditions:
 - Surrounded on at least 30% of its perimeter by non-forest, developed or improved uses, or
 - Sold, conveyed, or had assessed value within three years of preservation for greater than \$8,000 average price per acre for the bare land, or
 - Would have a fair market value after conversion to a non-forested “highest and best use” greater than the fair market value after preservation in subsection 4.1, as stated in a “highest and best use” study from a state certified general real estate appraiser in good standing

Additionality (Section 6)

Additionality is ensured through the following:

- Prior to the start of the project, the trees in the Project Area are not protected via easement or recorded encumbrance or in a protected zoning status that preserves the trees.
- The zoning in the Project Area must currently allow for a non-forest use
- The trees in the Project Area face a threat or risk of removal or conversion out of forest
- The Project Operator records in the public land records an easement, covenant, or deed restriction specifically protecting the trees for the project duration of 40 years or 100 years (40 or 100 years depending on the protocol version)

Quantification for Credits (Section 11)

The full Protocol describes the following steps for carbon stock and soil carbon quantification in detail:

1. Stored carbon stock present in Project Area (Section 11.1)
Estimate the biomass stock present and adjust for uncertainty to calculate the “Accounting Stock”. This can be done using the US Forest Service General Technical Report NE-343 tables, on-site inventory of some live trees with i-Tree methods and tools, or an on-site forest inventory
2. Areas expected to remain in trees after potential development (Section 11.2)
Calculate the fraction of the Accounting Stock that likely would be emitted as a result of development, to calculate “Avoided Biomass Emissions”
3. Claiming additional credit for growth (Section 11.3)
The Project Operator may elect to also account for ongoing growth of trees within the Project Area after Project Commencement
4. Quantification of soil carbon (Section 11.4)
Calculate “Avoided Soil Carbon Emissions” caused by conversion of soils to impervious surfaces in the Project Area
5. Deduction for displaced development (Section 11.5)
Apply the deductions in Section 11.5 to Biomass and Soil Carbon calculations to adjust for development and emissions that would be displaced by the preservation of the Project Area (leakage deductions). This will reduce the creditable tonnes of Avoided Biomass Emissions and Avoided Soil Carbon Emissions to adjust for displaced development
6. Quantify Co-Benefits (Section 11.6)
The Project Operator will calculate co-benefits separately from CO₂(e). The Registry will supply a spreadsheet template based on their climate zone, and will provide values for rainfall interception, reductions of air compounds, and energy savings.

Social Impacts (Section 12)

The Project Operator will describe how the Project impacts contribute towards achievement of the global UN Sustainable Development Goals (SDGs). The Registry will supply a template to evaluate how the Project aligns with the SDGs.

Attestation of No Net Harm and No Double Counting (Section 5)

The Project Operator will sign an attestation that no project shall cause net harm and no project shall seek credits on trees, properties, or projects that have already received credits.

Validation and Verification by Third-Party Verifiers (Section 13 and 14)

Project compliance and quantification must be verified by a third-party Validation and Verification Body approved by the Registry.

Issuance of Credits to Project Operator (Section 7)

Ex-post credits are issued after the biomass is protected via a recorded encumbrance protecting the trees. Issuance is phased or staged over one and five years at the equivalent of 50 acres of crediting per year. This staged issuance reflects the likely staging of development over time if the Project Area were to have been developed.

After validation and verification, the Registry issues credits to the Project Operator based on the Project Area size:

- 50 acres or less: all credits are issued after validation and verification
- Greater than 50 but less than 200 acres: credits are issued in the equivalent of 50 acres per year
- Greater than 200 acres: credits are issued in equal amounts over five years

Credits for Reversal Pool Account (Section 7.3):

The Registry will issue 90% of Project credits earned and requested and will hold 10% in the Registry's Reversal Pool Account.

Understand Reversals (Section 9)

If the Project Area loses credited carbon stock, the Project Operator must return or compensate for those credits if the tree loss is due to intentional acts or gross negligence of Project Operator. If tree loss is due to fire, pests, or other acts of God (i.e., not due to the Project Operator's intentional acts or gross negligence), the Registry covers the reversed credits from its Reversal Pool Account of credits held back from all projects.

Monitoring and Reporting (Section 8)

The Project Operator must submit a report every three years for the project duration. The reports must be accompanied by some form of telemetry or imaging that captures tree canopy, such as Google Earth, aerial imagery, or LiDAR. The reports must estimate any loss of stored carbon stock or soil disturbance in the Project Area.

PROJECT OVERVIEW

Project Name: Davey Corporate Forest Preservation

Project Number: 26

Project Type: Preservation Project (under the Tree Preservation Protocol – version 11.40, dated February 7, 2022)

Project Start Date: October 13, 2022

Project Location: City of Kent and Brimfield Township, Portage County, OH

- Project Site 1: Within Parcel 17-043-00-00-013-000 between SR 43 and Hudson Rd in the city of Kent, Ohio.
- Project Site 2: Parcel 17-007-00-00-001-003 on St. Clair Ave. in the city of Kent, Ohio.
- Project Site 3: Parcel 04-025-00-00-003-013 on Lynn Rd. in Brimfield Township, Ohio.

Project Operator Name: Davey Resource Group, Inc.

Project Operator Contact Information: TJ Mascia, TJ.Mascia@davey.com, 252-723-0815

Project Description:

The Davey Corporate Forest Preservation Project will preserve 21.4 acres of deciduous forest that were facing development pressure within a growing urban area in Portage County, Ohio. The Project Area consists of three parcels within the impaired Cuyahoga River watershed with a forest age ranging from 25 to 80 years old. By protecting these tree stands, Davey Tree Expert Company's "Davey" employees and the greater community will continue to receive the co-benefits of these trees for years to come. The Project preserves the forest under a deed restriction with a term of 40 years.

Davey is proud to register the company-owned parcels as a Tree Preservation Project with City Forest Credits. In so doing, Davey gains a valuable opportunity to introduce partners, employees, and the general public to the process of leading a forest carbon preservation project, as well as educate out-of-state teams and provide training and meetings on the topic of forest preservation. The preserved tree stands will serve as a living demonstration of carbon sequestration and the co-benefits provided by urban trees.

This project is also notable for its use of a full on-site tree inventory for carbon quantification and applications in monitoring. The use of a complete inventory increases the educational value of this Tree Preservation project for Davey, prospective project operators, and the registry.

Project Site 1

The first property in the Project Area is located on a parcel privately owned by Davey within the city limits of Kent, OH. The Project Area is 8.97 acres in size and is dominated by maple (*Acer spp.*), cherry and plum (*Prunus spp.*), and oak (*Quercus spp.*) tree species. Other stand characteristics include:

- The stand is approximately 80 years old.
- Prior to the preservation commitment, the land use designation was office space and is not in an overlay zone that prohibits all development.
- Greater than 30% of the project perimeter is surrounded by non-forest including residential, school district, agricultural, and commercial properties. The Project Area is in an industrial research and office zone.

Project Site 2

The second property is one parcel privately owned by Davey within the city limits of Kent, Ohio. The Project Area is 9.92 acres in size and is characterized by maple (*Acer spp.*), oak (*Quercus spp.*), and black cherry (*Prunus serotina*). Other stand characteristics include:

- The majority of the stand is 55 years old, while a smaller portion of the stand is 25 years old.
- Prior to the preservation commitment, the land use designation was industrial and is not in an overlay zone that prohibits all development.

- Greater than 30% of the project perimeter is surrounded by non-forest including residential, school district, agricultural, and commercial properties. The Project Area is in an industrial zone and the land is vacant.

Project Site 3

The third property is one parcel privately owned by Davey within Brimfield Township, Ohio. The Project Area is 2.51 acres in size and is characterized by tulip tree (*Liriodendron tulipifera*), black locust (*Robinia pseudoacacia*), and maple (*Acer* spp.). Other stand characteristics include:

- Half of the stand is approximately 35 years old while the other is approximately 65 years old.
- Prior to the preservation commitment, the land use designation was residential and is not in an overlay zone that prohibits all development.
- Greater than 30% of the project perimeter is surrounded by non-forest including residential properties and a park. The Project Area is in a residential zone and the land is vacant.

LOCATION OF PROJECT AREA (Section 1.3 and 1.4)

Project Area Location

The 21.4-acre Project Area is composed of three sites that are located in Portage County, Ohio, entirely within the 2010 U.S. Census Urbanized Area Reference Map for Akron, Ohio.

The average precipitation for the Project Area from 2001 to 2020 is 87.27 inches, including frozen and liquid precipitation per NOAA.

Project Area Parcels

List of parcel(s) in the Project Area.

Project Site	Jurisdiction / Location	Parcel Number	Description / Notes
1	Kent, Portage County, Ohio	17-043-00-00-013-000	The property is 18.43 acres, and the Project Area is 8.97 acres.
2	Kent, Portage County, Ohio	17-007-00-00-001-003	The property is 10.28 acres. The Project Area is 9.92 acres.
3	Brimfield Township, Portage County, Ohio	04-025-00-00-003-013	The property is 2.51 acres, and the Project Area is 2.51 acres.

Project Area Maps

Provide maps of the Project Area with geospatial location vector data in 1) pdf form and 2) any file type that can be imported and read by Google Earth Pro (example KML, KMZ, or Shapefile format). Maps should include relevant urban or town boundaries, legend, and defined Project Area.

Total Project Area

- Geospatial location (boundaries) of Project Area
Filename: Appendix A Project Area Geospatial Locations.zip
- Regional-scale map of Project Area
Filename: Appendix B Regional and Urban Location.pdf

Detailed map of each Project Area site

Filename: Appendix C Project Boundary Site Maps.pdf

OWNERSHIP OR ELIGIBILITY TO RECEIVE POTENTIAL CREDITS (Section 1.5)

Project Operator must demonstrate ownership of potential credits or eligibility to receive potential credits. If the Project Operator is not the same as the landowner of the Project Area, provide agreement(s) between Project Operator and landowner authorizing Project Operator to execute this project.

Name of landowner of Project Area and explanation: The Davey Tree Expert Company “Davey” is the landowner and Davey Resource Group, Inc. “DRG” is the Project Operator. Davey signed an Agreement to Transfer Potential Credits on October 13, 2022, naming DRG as Project Operator. See attached Deeds and signed Agreement to Transfer Credits.

Filenames:

- *Appendix D Deeds*
- *Appendix E Agreement to Transfer Potential Credits*

PRESERVATION COMMITMENT (Section 4.1)

Preservation Term (years applicable): 40

Preservation Commitment explanation:

A deed restriction was recorded on title of the three project sites within the Davey Corporate Forest Preservation Project Area. Section E of the deed restriction protects the trees from removal for 40 years.

Filename: Appendix F Deed Restriction

Date signed and date recorded: signed on October 13, 2022, and recorded on November 10, 2022.

DEMONSTRATION OF THREAT OF LOSS (Section 4.2, 4.3, and 4.4)

Kent is a growing city; between 2010 and 2019, the city population grew by 2.6%. The Portage County’s Auditor Office shows the combined value of the three parcels within the Project Area has increased by 31% between 1994 and 2018 according to the earliest and most recent assessment available through the

County's website. In reviewing the trends within the city of Kent, there has been a 14.5% increase in the median value of home prices between 2010 and 2019.

This growth of Kent and Portage County demonstrates pressure on the forested parcels within the Project Area for development as industrial, commercial, or residential land uses.

At the same time, Davey is a growing company. Between 2010 and 2020, Davey employees grew by 34% nationally, and the company increased the square footage of land for various facilities and offices by 195,594 ft². In 2020, Davey announced that it would be adding 70 additional jobs (+17%) in Kent. To accommodate these additional employees, in 2019 the corporate building broke ground on a new wing to the office complex and additional parking spaces, removing some of the trees on the property. With trends of company growth projected to continue in the coming years, Davey will be faced with balancing growth and environmental stewardship in Portage County, Ohio.

In 2021, Davey subdivided 1.75 acres of forested area and an access road from parcel 17-043-00-00-013-000 and exchanged it for another property with the Kent School District.

Land Use Designations

Project Site 1

The land on which the Project Area is located is home to Davey's corporate offices, including the Davey Institute. The project site falls within City of Kent I-R - Industrial Research and Office zoning and abuts a large area of R-2 medium density residentially zoned lots.

Filenames:

- *Appendix G Zoning Map Kent, Sites 1 and 2.pdf*
- *Appendix H Zoning Description, Site 1.pdf*

Project Site 2

The project site falls within the City of Kent I - Industrial District zoning. This site is across the street from a Davey vehicle service shop, 0.1 miles from Davey Resource Group corporate offices, and less than 0.5 miles away from an R-4 multifamily residential district.

Filenames:

- *Appendix G Zoning Map Kent, Sites 1 and 2.pdf*
- *Appendix H Zoning Description, Site 2.pdf*

Project Site 3

The project site is within Brimfield Township Residential Zoning District, R-2, which provides for medium density residential development with up to one dwelling per acre.

Filenames:

- *Appendix G Zoning Map Brimfield Township, Site 3.pdf*
- *Appendix H Zoning Description, Site 3.pdf*

Overlay zones or other restrictions: None

Threat of loss (Section 4.4 A, B, or C):

Describe which of the three conditions the Project Area meets and provide supporting evidence such as maps, sale or assessed value documentation, or appraisal information.

- *All three sites within the Project Area have at least 30% of their perimeters surrounded by non-forest, developed, or improved uses. Project Site 1: Surrounded by improved/developed industrial and residential use on 100% of its perimeter.*
- *Project Site 2: Surrounded by improved/developed industrial and residential use on 72% of its perimeter.*
- *Project Site 3: Surrounded by improved/developed residential use on 100% of its perimeter.*

Filename: Appendix I Improved Use Site Maps.pdf

ATTESTATION OF NO DOUBLE COUNTING OF CREDITS AND NO NET HARM (Section 5)

Complete and attach the following attestation: Attestation of No Double Counting of Credits and Attestation of No Net Harm. Provide any additional notes as relevant.

Davey Resource Group signed the Attestation of No Double Counting of Credits and No Net Harm.

Filename: Appendix J Attestation of No Double Counting of Credits and No Net Harm.pdf

ADDITIONALITY (Section 4, 6, and 11)

Additionality is demonstrated by carbon projects in several ways, as described in the City Forest Credits Standard Section 4.9.1 and Tree Preservation Protocol.

Project Operator demonstrates that additionality was met through the following:

- Prior to the start of the project, the trees in the Project Area are not protected via easement or recorded encumbrance or in a protected zoning status that preserves the trees
 - See Demonstration of Threat of Loss section above
- The zoning in the Project Area must currently allow for a non-forest use
 - See Demonstration of Threat of Loss section above
- The trees in the Project Area face some threat risk of removal or conversion out of forest
 - See Demonstration of Threat of Loss section above
- The Project Operator records in the public land records an easement, covenant, or deed restriction specifically protecting the trees for the project duration of 40 years or 100 years (40 or 100 years depending on the protocol version)
 - See Preservation Commitment section above

Taken together, the above elements allow crediting only for unprotected trees, at risk of removal, which are then protected by a project action of preservation, providing additional avoided GHG emissions.

Additionality is embedded in the quantification methodology. Projects cannot receive credits for trees that would have remained had development occurred, nor can they receive soil carbon credits for soil that would have been undisturbed had development occurred.

The Project Operator has signed an Attestation of Additionality.

Filename(s): Appendix S Attestation of Additionality

CARBON QUANTIFICATION DOCUMENTATION (Section 11)

GHG Assertion

DRG asserts that the Project results in GHG emissions mitigation of 4,603 tonnes CO₂e attributed to the Project, with 4,143 credits to be issued to the Project Operator following a contribution to the registry reversal pool account. The table below represents the carbon quantification of the Project Area including Project Sites 1, 2, and 3 as determined by a complete inventory using i-Tree Eco.

Summary Numbers from Carbon Quantification Calculator

Carbon Quantification	Site 1	Site 2	Site 3	Total Project
Project Area (acres)	8.97	9.92	2.51	21.40
Does carbon quantification use stratification (yes or no)	No	No	No	Yes
Project stock (tCO ₂ e)	2,858	1,153	402	4,412
Accounting Stock (tCO ₂ e)	2,858	1,153	402	4,412
On-site avoided biomass emissions (tCO ₂ e)	2,572	1,038	361	3,971
On-site avoided soil carbon emissions (tCO ₂ e)	787	1,071	90	1,949
Deduction for displaced biomass emissions (tCO ₂ e)	471	190	66	727
Deduction for displaced soil emissions (tCO ₂ e)	239	325	27	591
Credits from avoided biomass emissions (tCO ₂ e)	2,101	848	295	3,244
Credits from avoided soil emissions (tCO ₂ e)	549	747	63	1,358
Total credits from avoided biomass and soil emissions (tCO₂e)	2,650	1,595	358	4,603
Contribution to Registry Reversal Pool Account (tCO ₂ e)	265	159	36	460
Total credits to be issued to the Project Operator (tCO₂) (excluding future growth)	2,385	1,435	322	4,143

Approach to quantifying carbon

To quantify carbon, a complete inventory was performed on all trees within the Project Area that had a diameter at breast height of 5 inches or more, corresponding to method 11.1.B in the CFC Tree Preservation Protocol. Carbon storage and sequestration estimates were obtained using i-Tree Eco modeling software using the complete inventory dataset.

Filenames:

- *Appendix K Carbon Quantification Spreadsheet.xlsx*
- *Appendix R i-Tree Eco Source File.xlsx*
- *Appendix R Davey Campus Inventory*

Accounting Stock Measurement Method (11.1)

Following Section 11.1.B in the CFC Tree Preservation Protocol, Accounting Stock was calculated as Project Stock minus one standard error. Because estimates were calculated on a complete inventory

rather than a sample inventory, the sampling standard error for the carbon estimates was 0, yielding an Accounting Stock that was equal to the Project Stock.

Stratification

Carbon estimates were calculated by i-Tree Eco from a complete inventory of the Project Area, stratified by stand location (three Project Sites).

Stand Maps

Project Site 1

The project site is one stand; stand composition was based on a complete tree inventory. The site was drawn in AutoCAD. The Project Area is predominantly maple (*Acer* spp.), plum (*Prunus* spp.), and oak (*Quercus* spp.).

Filename: *Appendix L Tree Characteristics Charts.pdf*

Project Site 2

The project site is one stand; stand composition was based on a complete tree inventory. The site was drawn in AutoCAD. The Project Area is predominantly maple (*Acer* spp.), oak (*Quercus* spp.), and black cherry (*Prunus serotina*).

Filename: *Appendix L Tree Characteristics Charts.pdf*

Project Site 3

The project site consists of one stand; stand composition was based on a complete tree inventory. The site was drawn in AutoCAD. The Project Area is predominantly tulip tree (*Liriodendron tulipifera*), black locust (*Robinia pseudoacacia*), and maple (*Acer* spp.).

Filename: *Appendix L Tree Characteristics Charts.pdf*

Forest Age

Forest age for the Project Area ranges from 25 years to 80 years among the three sites. An on-site inventory was completed, so no documentation of forest age is necessary for carbon quantification for this project.

Forest Composition

Per 11.1.B, a complete inventory was conducted on trees over 5 inches in diameter at breast height. An Urban Forester within Davey Resource Group, Inc. inventoried trees within the Project Area—noting genus or species identification, crown condition, and diameter at breast height—to accurately identify forest composition. Standing dead trees were included, while dead wood on the forest floor was excluded from the inventory.

Filenames:

- *Appendix L Tree Characteristics Chart.pdf*
- *Appendix Q Site Photos.pdf*

Canopy Cover

An on-site inventory was completed, so no documentation of canopy cover is necessary for carbon quantification for this project. However, an i-Tree Canopy report was completed to quantify the co-benefits. The canopy cover across all three sites was between 90% and 96% cover.

Filename: *Appendix M i-Tree Canopy Report.pdf*

Area Expected to Remain in Trees after Potential Development (11.2)

Project Site 1

This site within the city of Kent is a portion of one large parcel that is zoned Industrial Research & Office. Kent zoning regulations permit full development of Industrial Research & Office parcels with a required vegetated buffer or setback of 60 ft along the lot frontage and 25 ft along the sides of the parcel. The area expected to remain in trees after potential development is as low as 0%, resulting in estimated Avoided Biomass Emissions of 90% of Accounting Stock.

Filenames:

- *Appendix H Zoning Description, Site 1.pdf*
- *Appendix N Potential Development Map, Site 1.pdf*

Project Site 2

This site within the city of Kent is one large parcel that is zoned Industrial. Kent zoning regulations permit full development of Industrial parcels but require a vegetated buffer or setback of 50 ft along the lot frontage and 25 ft along the sides and back of the parcel. The area expected to remain in trees after potential development is as low as 0%, resulting in estimated Avoided Biomass Emissions of 90% of Accounting Stock.

Filenames:

- *Appendix H Zoning Description, Site 2.pdf*
- *Appendix N Potential Development Map, Site 2.pdf*

Project Site 3

Within Brimfield township, the parcel is zoned as a R-2 Residential District for medium-density residential development (Brimfield Township Zoning Resolution 2016). Brimfield zoning regulations permit development of single-family dwellings as well as public facilities including churches, daycare centers, residential developments, and publicly owned buildings.

While tree preservation is “highly encouraged” within the zoning resolution, it is not required if developers can justify that their site layout and grading plans require removal of all trees. The area expected to remain in trees after potential development is as low as 0%, resulting in estimated Avoided Biomass Emissions of 90% of Accounting Stock.

Filename:

- *Appendix H Zoning Description, Site 3.pdf*
- *Appendix N Potential Development Map, Site 3.pdf*

Quantification of Soil Carbon - Existing Impervious Area and Impervious Limits (11.4)

Project Site 1

6.56 acres (73%) of Site 1 is eligible for development including buildings, parking lots, and other impervious surfaces. Sidewalks are permitted within buffer areas along rights-of-way. Parking lots containing more than 50 spaces are required to include landscaping covering 5% of the surface area. Carbon estimates are based on the 73% of the site that is eligible for conversion to impervious surface.

Filename: *Appendix H Zoning Descriptions, Site 1.pdf*

Project Site 2

8.93 acres (83%) of the parcel containing Site 2 is eligible for development including buildings, parking lots, and other impervious surfaces. Sidewalks are permitted within buffer areas along rights-of-way; at this site, a sidewalk along the eastern border would add 1% of additional impervious surface. Parking lots

containing more than 50 spaces are required to include landscaping covering 5% of the surface area. At present, the site contains 0% impervious surface. Because some of the required buffer falls outside of the project area, carbon estimates assume that 8.93 acres (90%) of the site within the project area is eligible for conversion to impervious surface.

Filename: *Appendix H Zoning Description, Site 2.pdf*

Project Site 3

Currently, the site contains 0% impervious surface. According to the schedule of residential zoning districts for Brimfield Township, the maximum impervious surface area for a R-2 Residential district is 20% for sites greater than 1.5 acres in size. However, zoning regulations allow the parcel to be divided into two, in which case maximum impervious area is permitted to be up to 30% of each parcel. Carbon estimates assume that 0.75 acres (30%) of the parcel is eligible for conversion to impervious surface.

Filename: *Appendix H Zoning Description, Site 3.pdf*

Future Planned Project Activities

With a deed restriction in place, Davey will not build or perform any activities that would negatively affect the forest. Future planned project activities include mowing the borders of the sites as well as using the sites for training purposes including tree identification, invasive vegetation management, pest and disease monitoring, and other training related to Davey operations. Some of these activities—particularly invasive species management and pest/disease monitoring—may positively affect tree canopy growth, resulting in additional carbon credits as measured by future complete tree inventories.

CO-BENEFITS QUANTIFICATION DOCUMENTATION (Section 11.6)

Co-benefits were quantified using CFC’s co-benefits calculator. In total, Project Area trees provide co-benefits valued at \$45,397 per year.

Co-Benefits per year (avoided costs) with current tree cover

Ecosystem Services	Resource Unit Totals	Total Value (\$)
Rain Interception (m3/yr)	10,162	\$21,479
Air Quality (t/yr)		
O3	0.35	\$735
NOx	0.15	\$315
PM10	0.17	\$654
Net VOCs	0.02	\$24
Air Quality Total	0.70	\$1,728
Energy (kWh/yr & kBtu/yr)*		
Cooling- Electricity*	30,858	\$4,323
Heating - Natural Gas*	1,277,374	\$17,866
Energy (\$/yr)*		\$22,189
Grand Total (\$/yr)		\$45,397

Co-Benefits

In addition to the co-benefits listed above, the project will protect habitat within the Cuyahoga River watershed. The Cuyahoga River is famously degraded, perhaps best known for a series of river fires that ended in 1969. A majority of the watershed has been designated a Great Lakes Area of Concern by the International Joint Commission; the Area of Concern begins just one mile from the Project Area. The project seeks to improve tree canopy and water filtration that can help address beneficial use impairments that have resulted in the designation of the Cuyahoga River Area of Concern. It joins a large regional effort to have the Cuyahoga River delisted as an Area of Concern.

Specifically, the Project Area protects habitat within the Fish Creek-Cuyahoga River subwatershed, where noted watershed impairments include abnormal flow, bacteria and other microbes, degraded habitat, and nitrogen and/or phosphorus. The Project Area also lies within the City of Akron-Little Cuyahoga River subwatershed, where noted impairments include bacteria and other microbes, degraded habitat, and low oxygen. Lastly, the Project Area lies within the Feeder Cabal-Breakneck Creek subwatershed, where impairments include abnormal flow, bacteria and other microbes, degraded habitat, low oxygen, sediment, and toxic chemicals. In addition to these subwatersheds, the Project Area abuts other small tributaries of the Cuyahoga River.

The project will also contribute to social co-benefits in the city of Kent and surrounding Portage County. Per the 2020 U.S. Census, 24% of Kent residents live below the poverty line, compared to a county average of 10% and a state average of 13%.

As a college town, Kent also has a high proportion of rental properties—59% percent of occupied houses are rentals, compared to 29% in Portage County and 34% in Ohio. As noted in a 2022 report from Joint Center for Housing Studies of Harvard University, “America’s Rental Housing”, renter households are particularly vulnerable to the effects of climate change. Tree canopy preservation will help mitigate flooding risk and urban heat island effect for vulnerable populations in Kent.

SOCIAL IMPACTS (Section 12)

Three of the UN Sustainable Development Goals align with the Davey Corporate Campus Preservation Project. These include Good Health and Well Being, Clean Water and Sanitation, and Sustainable Cities and Communities.

SDG 3, Good Health and Well Being: Tree canopy provides an array of benefits to surrounding communities, including cleaner air and water, cooler temperatures, energy savings, and reduced flooding. The Project Area is located within a growing urban area where residents are particularly vulnerable to poor air quality and urban heat island effect. Tree canopy in the project area will provide cleaner air, energy savings, and cooler temperatures to help mitigate these effects on vulnerable populations including renters, residents who live in poverty, and residents over age 65. In addition, the Cuyahoga River is a major local source of recreation for Kent and the surrounding area. Tree canopy preservation will help protect the river for fishing, paddling, and walking/running along trails that extend through downtown Kent.

SDG 6, Clean Water and Sanitation: The Project Area is situated within the Cuyahoga River Area of Concern. Stormwater benefits through tree preservation will help with filtration of the water that is being fed into the impaired Cuyahoga River watershed, which is a significant local recreation site for kayaking, swimming, and fishing. Beneficial use impairments of the Cuyahoga River include degradation of fish and wildlife populations, loss of fish habitat, and beach closings farther downriver. Preservation of these sites will help to protect and promote overall watershed health.

SDG 11, Sustainable Cities and Communities: In the growing city of Kent, this project is an important part of equalizing health disparities and making the surrounding urbanized area more resilient to climate change. Tree preservation will benefit local residents by providing energy savings, cleaner air and water, and improved human health, contributing to the goal of making cities inclusive, safe, resilient, and sustainable. Local vulnerable populations include renters and residents who live in poverty.

Filename: Appendix P Social Impacts.pdf

MONITORING AND REPORTING (Section 8)

Throughout the Project Duration, the Project Operator must report on tree conditions across the Project Area. Monitoring reports are due every three years determined by the date of the verification report. For example, if the verification report is dated January 1, 2021, the first report will be due by January 1, 2024, and every three years thereafter for the duration of the project.

Describe your monitoring plans. If Project Operator plans to claim credits for future growth, describe methods that will be used to quantify future growth.

With arborist and urban forestry staff located in Kent, Ohio, Davey staff assigned to this project will monitor and report on the findings to City Forest Credits on a triennial cycle. With multiple visits to the

corporate campus each year, staff will maintain a constant eye on the goings on at the property to ensure the tenets of the conservation easement and preservation commitment are upheld.

The complete inventory can serve as an illustrative model for other carbon credit projects nationally. The anticipated benefits of a full inventory provide more certainty in carbon estimates over time and applications in monitoring and quantifying carbon from additional growth.

Davey anticipates using the inventory to sample tree health during the monitoring period, to supplement triennial reports. Repeating the inventory in later project years can help capture any additional credits gained from future growth.

Agreement to Transfer Credits

Appendix E

Agreement to Transfer Potential Credits

Agreement to Transfer Potential Credits

This Agreement to Transfer Potential Credits (“**Agreement**”) is entered into this 13th day of October, 2022 (the “**Effective Date**”) by The Davey Tree Expert Company, an Ohio corporation (the “**Landowner**”) and Davey Resource Group, Inc., DBA Davey Mitigation, a Delaware corporation (“**Project Operator**”) whose mission is providing environmental consulting services, including, but not limited to wetlands and stream studies, environmental design and ecosystem restoration, stormwater management and compliance, urban and community forestry, and invasive species management, and who has undertaken a tree preservation and carbon crediting project (“**Tree and Carbon Project**”) on the Property of Landowner (the “**Property**”).

1. Purpose and Intent

Project Operator and Landowner desire to generate funds for this Tree and Carbon Project by allowing Project Operator to develop potential carbon and environmental credits that it can attempt to sell.

These potential carbon or environmental credits or offsets include amounts of carbon dioxide stored, stormwater run-off reductions, energy savings, habitat, and air quality benefits arising from the planting, growth and preservation of trees and preservation of forest soils in the Tree and Carbon Project (“**Carbon+ Credits**”). The Carbon+ Credits will be developed using the protocols and registry of City Forest Credits, a non-profit organization (“**CFC**”).

2. Rights Granted

Landowner grants Project Operator the title and rights to any and all Carbon+ Credits developed from the Tree and Carbon Project during the term of this agreement, including rights to register with CFC, and develop and sell the Carbon+ Credits. The Landowner retains the right to direct the Project Owner to terminate the Project.

3. Subject Lands

The Property specified in Exhibit A.

4. Obligations of Landowner

Landowner shall not cut, harvest, or damage trees in the Tree Project except in cases of emergency involving fire or flooding or to mitigate hazard if trees are identified as a hazard by a certified arborist. In the event that emergency tree work is necessary, it will take place at the expense of the landowner.

5. Obligations of Project Operator

Project Operator will pay all costs and assume all responsibilities for development and sale of Carbon+ Credits from the Tree Project.

6. Landowner Representations

Landowner represents that it has authority to enter this agreement, and that the Property is free from any liens, claims, encumbrances, tenancies, restrictions, or easements that would prevent or interfere with the rights to Carbon+ Credits granted under this Agreement.

7. Project Operator Representations

Project Operator represents that it has either begun the Tree and Carbon Project or is prepared to act as the Project Operator for the Tree and Carbon Project.

8. Default

If either party is in default of this agreement, the other party may notify the defaulting party of the specific nature of the default. The defaulting Party has 30 days from the date of notice to correct the default. If the default is not corrected in 30 days, the non-defaulting party may cancel this agreement. Notice of cancellation shall be delivered in writing to the current contact address of the defaulting party.

9. Term of Agreement and Option to Renew

This Agreement shall remain in force for 40 years after the Effective Date of the Agreement. Project Operator However, if the Project Implementation Agreement terminates, this agreement shall also terminate. Operator may renew this Agreement for a second 40 years if it delivers written notice of renewal to Landowner at least 90 days prior to expiration of this Agreement; provided, however, Owner may terminate this Agreement upon not less than thirty (30) days prior notice to Project Operator, in which even Project Operator shall exercise its right to terminate that certain Project Implementation Agreement dated as of the date hereof by and between Project Operator and City Forest Credits carbon registry.

10. Governing Law

This agreement shall be construed and enforced in accordance with the laws of the State of Ohio.

EXHIBIT A

LEGAL DESCRIPTION OF THE PROPERTY

PROJECT SITE #1

PPN: 17-043-00-00-013-000 and PPN: 17-042-00-00-002

Situated in the City of Kent, County of Portage and State of Ohio, and known as being part of Lots 42 and 43 in Franklin Township and further described as follows:

Beginning at an iron pipe at the northwest corner of Lot 42;

then South 88 deg. 52 minutes East 1480.16 feet, along the north line of Lot 42, to a spike in the centerline of State Route 43 and passing over an iron rod 36.18 feet from the road center;

then South 25 deg. 19 minutes 20 seconds West 536.07 feet, along the centerline of State Education property;

thence North 88 deg. 59 minutes 15 seconds West 1988.91 feet, along the north line of said property, to an iron pipe and passing over an iron pipe 36.21 feet from the road center;

then South 1 deg. 00 minutes 45 seconds West 703.16 feet to an iron pipe;

then North 88 deg. 55 minutes 45 seconds West 987.15 feet to the centerline of Hudson Road and passing over an iron pipe 31.54 feet from the road center;

thence North 13 deg. 17 minutes West 601.83 feet, along the centerline of Hudson Road, to an iron pipe;

thence North 14 deg. 47 minutes 15 seconds West 683.23 feet, along the centerline of Hudson Road, to a spike in the north line of Lot 43 and the grantor's northwest corner;

thence South 88 deg. 53 minutes 20 seconds East 2038.98 feet, along the north line of Lot 43 to the beginning and passing over an iron pipe 30.92 feet from the road center.

Exception #1:

EXCEPTING from the above-described parcel, a fifty (50) foot strip of land deeded to the City of Akron in Volume 225, Page 276, described as follows:

Beginning at a concrete monument in the north line of Lot 42 and being North 88 deg. 42 minutes West 201.11 feet from a spike at the intersection of said lot line with the centerline of State Route 43;

thence South 48 deg, 12 minutes 45 seconds West 719.68 feet to the north line of Kent City Board of Education property;

thence North 88 deg. 59 minutes 15 seconds West 73.59 feet along said north line;

thence North 48 deg. 12 minutes 45 seconds East 719.91 feet to the north line of Lot 42;

thence South 88 deg. 52 minutes East 73.42 feet to the beginning.

Containing 0.826 of an acre of land in said exception.

And leaving to be conveyed a total of 54.260 acres of land, of which 14.589 acres are in Lot 42 and 39.671 acres are in Lot 43, be the same more or less, but subject to all legal highways, as surveyed in August, 1980, by David J. Collier, Registered Surveyor No. 4819.

Exception #2:

FURTHER EXCEPTING THEREFROM THE FOLLOWING:

Situated in the City of Kent, County of Portage and State of Ohio and known as being part of Lot 43 in Franklin Township and further described as follows:

Beginning in the centerline of Hudson Road (60' R/W) and being S 14°47' 15" E 357.43 feet from a monument at the intersection of said centerline with the north line of Lot 43;

thence S 88° 55' 45" E 611.10 feet to an iron pipe and passing over an iron pipe 31.19 feet from the road center;

thence S 14° 47' 15" E 155.93 feet to an iron pipe;

thence S 88° 55' 45" E 558.67 feet to an iron pipe at the northwest corner of the Kent City Board of Education;

thence S 1°00' 45" W 703.16 feet to an iron pipe at the grantors southeast corner;

thence N 88° 55' 45' W 987.15 feet to the grantor's southwest corner in be centerline of Hudson Road and passing over an iron bar 31.54 feet from the road center;

thence N 13° 17' W 601.83 feet along the centerline of Hudson Road to a monument;

thence N 14° 47' 15' W 280.80 feet along the centerline of Hudson Road to the beginning.

Containing 19.491 acres of land, be the same more or less but subject to all legal highways, as surveyed in June, 1995 by Edward J. Collier, Registered Surveyor No. 7141.

Exception #3:

LESS AND EXCEPT THE FOLLOWING DESCRIBED TRACT:

Situated in the City of Kent, County of Portage and State of Ohio and known as being part of Original Franklin Township Lot No. 43, further known as being part of a 34.769 acre parcel of land conveyed to The Davey Tree Expert Co. by deed dated April 17, 1984 and recorded in O.R. 1013, Page 203 of the Portage County Recorder's Records and is bounded and described as follows: Beginning at a 1 inch iron pin found in a monument box assembly at the intersection of the centerline of Hudson Road, 60 feet in width and the North line of Lot No. 43; thence South 16°27'43" East, along the centerline of Hudson Road, 227.66 feet to a point thereon and is the Principal Place of Beginning of the premises herein to be described:

thence North 89°24'13" East, 611.11 feet to a 5/8 inch by 30 inch iron pin set with cap "DRG ENG 7631-8557";

thence South 16°27'27" East, 129.68 feet to a northeasterly corner of a 19.491 acre parcel of land conveyed to Kent City School District Board of Education by deed dated July 14, 1995 and recorded in O.R. 38, page 543 of the Portage County Recorder's Records, being witnessed by a 1 inch iron pin found North 89°24'13" East, 0.14 feet therefrom;

thence South 89°24'13" West, along the northerly line of land so conveyed to Kent City School District Board of Education, 611.10 feet to a point on the centerline of Hudson Road, having passed over a 3/4 inch iron pin found at 579.85 feet therefrom;

thence North 16°27'43" West; along the centerline of Hudson Road, 129.68 feet to the principal place of beginning, containing 76,230 square feet or 1.7500 acres of land according to a survey by Guy P. Haney, P.S. No. S-7631, for Davey Resource Group in February of 2021. Subject to all highways, easements and covenants of legal record.

Bearings are based on Ohio State Plane Coordinate System, North Zone, NAD 1983, ground.

PROJECT SITE #2

PPN: 17-007-00-00-001-003

SITUATED IN THE CITY OF KENT, COUNTY OF PORTAGE AND STATE OF OHIO:

SUB LOT C5R AS SHOWN ON ROAD DEDICATION AND REPLAT OF PART OF BLOCK C AND PART OF BLOCK B OF THE DAVEY INDUSTRIAL PARK RECORDED IN PLAT NUMBER 2002-13 OF THE PORTAGE COUNTY, OHIO OFFICIAL RECORDS.

PROJECT SITE #3

PPN: 04-025-00-00-003-013

Situated in the Township of Brimfield, County of Portage and State of Ohio and known as being part of original Brimfield Township Lot 25 and is further being known as a part of Sub Lot No. 4 and 5 of the Ruggiero Acres Subdivision as is numbered, platted and recorded in Portage County Plat Book 24, Page 27;

Beginning at an iron pipe in the northerly line of Lynn Road TH 99, 60.00' wide, at the southwest corner of Sub Lot No. 5 in the said Ruggiero Acres Subdivision;

Thence along the westerly line of Sub Lot No. 5 N 00 Degrees – 30' W a distance of 499.44 feet to an iron pipe;

Thence N 56 degrees – 13' – 39" E a distance of 237.22 feet to an iron pipe in the easterly line of Sub Lot No. 4 in the said Ruggiero Acres Subdivision;

Thence along the easterly line of the said Sub Lot No. 4 S 00 Degrees – 30' E a distance of 604.02 feet to an iron pipe in the northerly line of Lynn Road;

Thence along the northerly line of Lynn Road S 87 Degrees – 15' 25" W a distance of 6.00 feet to an iron pipe at an angle point in said northerly line;

Thence continuing along the northerly line of Lynn Road S 82 Degrees – 00' W a distance of 194.00 feet to the beginning and containing 2.5108 acres of land be the same more or less but subject to all legal highways as surveyed in January, 1986 by Don Trocchio, Registered Surveyor No. 6445.

General Warranty Deed dated February 1, 1984, showing ownership of the site by Davey Tree Expert Company

GENERAL WARRANTY DEED

KNOW ALL MEN BY THESE PRESENTS, that CHARLES L. BOETTLE[✓], married; JAMES H. BOETTLE[✓], married; EUGENE G. BOETTLE[✓], married; and HARRIET B. BOETTLE[✓], widowed and not remarried, by James H. Boettler, her Attorney-In-Fact (collectively, the "Grantors"), for the consideration of TEN DOLLARS (\$10.00), and other good and valuable consideration, received to their full satisfaction of THE DAVEY TREE EXPERT COMPANY, an Ohio corporation (the "Grantee"), whose tax mailing address will be 117 S. Water Street, Kent, Ohio 44240, do give, grant, bargain, sell and convey unto the said Grantee, its successors and assigns, the following described premises (the "Land"):

Situated in the City of Kent, County of Portage and State of Ohio, and known as being part of Lots 42 and 43 in Franklin Township and further described as follows:

Beginning at an iron pipe at the northwest corner of Lot 42; then south 88 deg. 52 minutes east 1480.16 feet, along the north line of Lot 42, to a spike in the centerline of State Route 43 and passing over an iron rod 36.18 feet from the road center; then south 25 deg. 19 minutes 20 seconds west 536.07 feet, along the centerline of State Route 43, to the northeast corner of Kent City Board of Education property; thence north 88 deg. 59 minutes 15 seconds west 1988.91 feet, along the north line of said property, to an iron pipe and passing over an iron pipe 36.21 feet from the road center; then south 1 deg. 00 minutes 45 seconds west 703.16 feet to an iron pipe; then north 88 deg. 55 minutes 45 seconds west 987.15 feet to the centerline of Hudson Road and passing over an iron pipe 31.54 feet from the road center; thence north 13 deg. 17 minutes west 601.83 feet, along the centerline of Hudson Road, to an iron pipe; thence north 14 deg. 47 minutes 15 seconds west 638.23 feet, along the centerline of Hudson Road, to a spike in the north line of Lot 43 and the grantor's northwest corner; thence south 88 deg. 53 minutes 20 seconds east 2038.98 feet, along the north line of Lot 43 to the beginning and passing over an iron pipe 30.92 feet from the road center.

EXCEPTING from the above-described parcel, a fifty (50)-foot strip of land deeded to the City of Akron in Volume 225, Page 276, described as follows:

(P6427) ¹⁰⁵² REPAIR EXCEPTION 995/528

VOL 1013 PG 203

Beginning at a concrete monument in the north line of Lot 42 and being north 88 deg. 52 minutes west 201.11 feet from a spike at the intersection of said lot line with the centerline of State Route 43; thence south 48 deg. 12 minutes 45 seconds west 719.68 feet to the north line of Kent City Board of Education property; thence north 88 deg. 59 minutes 15 seconds west 73.59 feet along said north line; thence north 48 deg. 12 minutes 45 seconds east 719.91 feet to the north line of Lot 42; thence south 88 deg. 52 minutes east 73.42 feet to the beginning.

Containing 0.826 of an acre of land in said exception.

And leaving to be conveyed a total of 54.260 acres of land, of which 14.589 acres are in Lot 42 and 39.671 acres are in Lot 43, be the same more or less, but subject to all legal highways, as surveyed in August, 1980, by David J. Collier, registered surveyor No. 4819.

TOGETHER WITH all minerals, including without limitation, oil and gas and all constituents thereof, underlying the surface of the Land (the "Minerals"); and

TOGETHER WITH the reversionary interest (the "Reversionary Interest") set forth in a certain deed dated February 15, 1913 from Ann M. Boettler and C. A. Boettler to The City of Akron recorded in Volume 225, at Page 276 of Portage County Records (the "1913 Deed") in favor of the grantors of the 1913 Deed; and

TOGETHER WITH the right (the "Reserved Right"), to use the land described in the 1913 Deed, insofar as said use does not affect the location and maintenance of any pipes laid by The City of Akron. The Land, the Minerals, the Reversionary Interest and the Reserved Right are collectively referred to herein as the "Real Property".

TO HAVE AND TO HOLD the above granted and bargained Real Property, together with all improvements thereon and all appurtenances thereunto belonging, unto the said Grantee, its successors and assigns forever. And Charles L. Boettler, James H. Boettler, Eugene G. Boettler and Harriet B. Boettler, the said Grantors, do for themselves and their heirs and assigns, covenant with the said

VOL 1013 PG 204

Grantee, its successors and assigns, that at and until the
ensealing of these presents, they are well seized of the
above described Land and Minerals as a good and indefeasi-
ble estate in fee simple, own the above described Rever-
sionary Interest and Reserved Rights, and have good right
to bargain and sell the Real Property in the manner and
form as above written; that the Real Property is free and
clear from all incumbrances whatsoever, except for real
estate taxes and assessments, both general and special, not
yet due and payable; zoning ordinances; oil and gas leases
recorded in Volume 111, Page 299 and Volume 111, Page 301,
respectively, of Portage County Records; water line
easement and agreement recorded in Volume 769, Page 451 of
Portage County Records; easement recorded in Volume 228,
Page 43 of Portage County Records; and deed recorded in
Volume 225, Page 276 of Portage County Records; and that
they will warrant and defend said Real Property, with the
improvements and appurtenances thereunto belonging, to the
said Grantee, its successors and assigns forever, against
all lawful claims and demands whatsoever, except as above
set forth.

AND FOR VALUABLE CONSIDERATION, Darlene S.
Boettler, wife of Charles L. Boettler, Betty L. Boettler,
wife of James H. Boettler, and Marilyn A. Boettler, wife
of Eugene G. Boettler, do hereby remise, release and
forever quit-claim unto the said Grantee, its successors
and assigns, all their right and expectancy of dower in
the above-described Real Property.

IN WITNESS WHEREOF, Charles L. Boettler
and Darlene S. Boettler, James H. Boettler and Betty L.
Boettler, Eugene G. Boettler and Marilyn A. Boettler, and

LIMITED WARRANTY DEED

RA 9290

KNOW ALL MEN BY THESE PRESENTS, that DAVEY INVESTMENT COMPANY, an Ohio Corporation, having its address at 117 S. Water Street, Kent, Ohio 44240 (hereinafter the "Grantor"), for good and valuable consideration received to its full satisfaction of THE DAVEY TREE EXPERT COMPANY, an Ohio corporation (hereinafter the "Grantee"), whose tax mailing address will be 117 S. Water Street, Kent, Ohio 44240, does hereby give, grant, bargain and convey unto said Grantee, its successors and assigns, the premises (hereinafter the "Premises") situated in the City of Kent, County of Portage and State of Ohio, and being more particularly described in Exhibit "A", attached hereto and made a part hereof by this reference.

TOGETHER with all right, title and interest in and to any and all strips and gores and any land lying in any and all public or private streets or abutting the Premises, all other rights, privileges, and easements appurtenant thereto.

in and to any and all strips and gores and any land lying

And the Grantor, as present owner of the Premises herein conveyed and the allotter of Davey Industrial Park, has heretofore claimed a right of reversion as to the premises herein conveyed, as contained in Section 11 of Article III of the Davey Industrial Park Regulations affecting said premises, to wit:

alloter of Davey Industrial

"Section 11 REVERSION: Should the client purchaser lessor or lessee not proceed with construction within 18 months after the purchase date, then the land shall revert back to the Grantor or his authorized agents, at their option, at the purchase price of the land."

"Section 11 Reversion. Should the client purchaser lessor or lessee not proceed

VOL 1003 PG 0960

Grantor, for itself and its authorized agents, hereby assigns, releases, waives and forever relinquishes to Grantee, its successors and assigns, all rights and claims which the Grantor has under said Section 11 of Article III of said Regulations, and in the enforcement thereof.

And the Grantor, as present owner of the premises herein conveyed and the allotter of Davey Industrial Park, has heretofore claimed a right to grant or deny consent with respect to plans and specifications for improvements and construction of new buildings on the premises herein conveyed, as contained in Section 8(c) of Article III of the Davey Industrial Park Regulations affecting said premises, to wit:

"Section 8 CONSTRUCTION:

* * *

c. Plans and specifications for all improvements and new buildings shall first be submitted to the Grantor (or his authorized agent) and approved before construction commences, which written approval will not be withheld without reasonable basis."

Grantor, for itself and its authorized agents, hereby assigns, releases, waives and forever relinquishes to Grantee, its successors and assigns, all rights and claims which the Grantor has under said Section 8(c) of Article III of said Regulations, and in the enforcement thereof.

TO HAVE AND TO HOLD the above-granted Premises with the appurtenances thereto belonging unto said Grantee, its successors and assigns, forever.

And the said Grantor, for itself and its successors and assigns, does hereby covenant with the said Grantee, its successors and assigns, that the above-described Premises have not been conveyed or in any manner

VOL 1003 P.0361

encumbered by it, and that Grantor will warrant and defend the said Premises, together with all rights, privileges and easements thereunto belonging, to the said Grantee, its successors and assigns, forever, against all lawful claims and demands whatsoever of all persons claiming by, through, or under Grantor, except for real estate taxes and assessments for the tax year 1983 and thereafter, zoning and other ordinances, covenants, conditions, restrictions, rights of way and easements and other matters of record.

IN WITNESS WHEREOF, DAVEY INVESTMENT COMPANY, acting by and through its respective officers has executed this instrument, this 28 day of April, 1983.

THIS DECLARATION OF DEVELOPMENT RESTRICTIONS (this “**Declaration**”) is made this 13th day of October, 2022, by **THE DAVEY TREE EXPERT COMPANY**, an Ohio corporation (“**Declarant**”), for the purpose of instituting certain development restrictions on the Project Properties (as defined below) as more particularly set forth in this Declaration.

RECITALS

A. Declarant is the owner of certain real properties in the City of Kent and Brimfield Township, County of Portage, State of Ohio, and more particularly described in **Exhibit A** attached hereto and incorporated by reference (the “**Properties**”).

B. Declarant wishes to enroll portions of the Properties for crediting of carbon offsets via preservation of existing trees and forest resources under City Forest Credits (“CFC”) crediting protocol as further described in the project application approved April 8, 2022 and attached hereto as **Exhibit B** (the “Project”).

C. In furtherance of the Project and in accordance with requirements under the CFC protocol, Declarant wishes to impose certain development restrictions on the Properties as depicted in yellow on **Exhibit C** attached hereto and incorporated by reference (the “**Project Properties**”).

D. Declarant recognizes the value of the Project Properties as a climate asset. The trees on the Project Properties can potentially store CO₂, reduce stormwater runoff, improve air quality, provide energy savings from cooling and heating effects, and improve human health by providing cleaner air and a place for recreation, exercise, and public health benefits of exposure to nature. Removing the trees for other uses, such as parking lots or other improved uses would seriously impair the climate value of the Project Properties.

E. Declarant intends by this Declaration to preserve the trees on the Project Properties. It understands that this Declaration will bar the clearing or removing of trees for parking lots, buildings, or any reason other than forest health, hazard, disease, fire, and maintenance of existing trails.

DECLARATION

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Declarant, as owner of the Project Properties, hereby declares, grants, imposes, conveys, establishes, and accepts the following development restrictions and covenants which shall run with the land and be binding upon all owners of the Project Properties:

1. **Removal of Trees.** Declarant shall not cut down, destroy, or remove trees located on the Project Properties, except as necessary to control or prevent hazard, disease, fire, or improve forest health, or otherwise to maintain existing trails.

GENERAL PROVISIONS

2. **Run with land.** The covenants and restrictions declared, granted, conveyed, and established under this Declaration shall run with the land and inure to the benefit of, and be binding upon, Declarant and its heirs, beneficiaries, successors and assigns, and all future owners of the Project Properties.

3. **Term and modification.** The covenants and restrictions declared, granted, conveyed, and established under this Declaration shall remain in effect as long as it is needed to satisfy the requirements of any applicable carbon protocol under which carbon credits may be issued for the carbon preserved in the trees on the Project Properties, but in any event, shall terminate upon the date that is forty (40) years after the date of this Declaration. The Declarant has the right to terminate during the 40-year restriction if then current operator of the Project (“Project Operator”) provides the Registry (as defined below) of the carbon protocol with sixty (60) days’ notice of Project Operator’s intent to terminate and retires the same number of Carbon+ Credits that have been issued and released to Project Operator for this

Project. As used herein, "Registry" means City Forest Credits, a Washington nonprofit corporation, or its successor.

4. Governing law and venue. The terms and provisions of this Declaration shall be governed, construed, and enforced in accordance with the laws of the State of Ohio. Venue for any lawsuit arising out of this Declaration shall be in Portage County, Ohio.

5. Severability. In case any one or more of the provisions contained in this Declaration shall for any reason be held to be invalid, illegal or unenforceable in any respect, such invalidity, illegality, or unenforceability shall not affect any other provisions of this Declaration, but this Declaration shall be construed as if such invalid, illegal, or unenforceable provision had never been contained herein.

EXHIBIT A

LEGAL DESCRIPTION OF THE PROPERTY

PROJECT SITE #1

PPN: 17-043-00-00-013-000 and PPN: 17-042-00-00-002

Situated in the City of Kent, County of Portage and State of Ohio, and known as being part of Lots 42 and 43 in Franklin Township and further described as follows:

Beginning at an iron pipe at the northwest corner of Lot 42;

then South 88 deg. 52 minutes East 1480.16 feet, along the north line of Lot 42, to a spike in the centerline of State Route 43 and passing over an iron rod 36.18 feet from the road center;

then South 25 deg. 19 minutes 20 seconds West 536.07 feet, along the centerline of State Education property;

thence North 88 deg. 59 minutes 15 seconds West 1988.91 feet, along the north line of said property, to an iron pipe and passing over an iron pipe 36.21 feet from the road center;

then South 1 deg. 00 minutes 45 seconds West 703.16 feet to an iron pipe;

then North 88 deg. 55 minutes 45 seconds West 987.15 feet to the centerline of Hudson Road and passing over an iron pipe 31.54 feet from the road center;

thence North 13 deg. 17 minutes West 601.83 feet, along the centerline of Hudson Road, to an iron pipe;

thence North 14 deg. 47 minutes 15 seconds West 683.23 feet, along the centerline of Hudson Road, to a spike in the north line of Lot 43 and the grantor's northwest corner;

thence South 88 deg. 53 minutes 20 seconds East 2038.98 feet, along the north line of Lot 43 to the beginning and passing over an iron pipe 30.92 feet from the road center.

Exception #1:

EXCEPTING from the above-described parcel, a fifty (50) foot strip of land deeded to the City of Akron in Volume 225, Page 276, described as follows:

Beginning at a concrete monument in the north line of Lot 42 and being North 88 deg. 42 minutes West 201.11 feet from a spike at the intersection of said lot line with the centerline of State Route 43;

thence South 48 deg, 12 minutes 45 seconds West 719.68 feet to the north line of Kent City Board of Education property;

thence North 88 deg. 59 minutes 15 seconds West 73.59 feet along said north line;

thence North 48 deg. 12 minutes 45 seconds East 719.91 feet to the north line of Lot 42;

thence South 88 deg. 52 minutes East 73.42 feet to the beginning.

Containing 0.826 of an acre of land in said exception.

And leaving to be conveyed a total of 54.260 acres of land, of which 14.589 acres are in Lot 42 and 39.671 acres are in Lot 43, be the same more or less, but subject to all legal highways, as surveyed in August, 1980, by David J. Collier, Registered Surveyor No. 4819.

Exception #2:

FURTHER EXCEPTING THEREFROM THE FOLLOWING:

Situated in the City of Kent, County of Portage and State of Ohio and known as being part of Lot 43 in Franklin Township and further described as follows:

Beginning in the centerline of Hudson Road (60' R/W) and being S 14°47' 15" E 357.43 feet from a monument at the intersection of said centerline with the north line of Lot 43;

thence S 88° 55' 45" E 611.10 feet to an iron pipe and passing over an iron pipe 31.19 feet from the road center;

thence S 14° 47' 15" E 155.93 feet to an iron pipe;

thence S 88° 55' 45" E 558.67 feet to an iron pipe at the northwest corner of the Kent City Board of Education;

thence S 1°00' 45" W 703.16 feet to an iron pipe at the grantors southeast corner;

thence N 88° 55' 45" W 987.15 feet to the grantor's southwest corner in be centerline of Hudson Road and passing over an iron bar 31.54 feet from the road center;

thence N 13° 17' W 601.83 feet along the centerline of Hudson Road to a monument;

thence N 14° 47' 15" W 280.80 feet along the centerline of Hudson Road to the beginning.

Containing 19.491 acres of land, be the same more or less but subject to all legal highways, as surveyed in June, 1995 by Edward J. Collier, Registered Surveyor No. 7141.

Exception #3:

LESS AND EXCEPT THE FOLLOWING DESCRIBED TRACT:

Situated in the City of Kent, County of Portage and State of Ohio and known as being part of Original Franklin Township Lot No. 43, further known as being part of a 34.769 acre parcel of land conveyed to The Davey Tree Expert Co. by deed dated April 17, 1984 and recorded in O.R. 1013, Page 203 of the Portage County Recorder's Records and is bounded and described as follows: Beginning at a 1 inch iron pin found in a monument box assembly at the intersection of the centerline of Hudson Road, 60 feet in width and the North line of Lot No. 43; thence South $16^{\circ}27'43''$ East, along the centerline of Hudson Road, 227.66 feet to a point thereon and is the Principal Place of Beginning of the premises herein to be described:

thence North $89^{\circ}24'13''$ East, 611.11 feet to a 5/8 inch by 30 inch iron pin set with cap "DRG ENG 7631-8557";

thence South $16^{\circ}27'27''$ East, 129.68 feet to a northeasterly corner of a 19.491 acre parcel of land conveyed to Kent City School District Board of Education by deed dated July 14, 1995 and recorded in O.R. 38, page 543 of the Portage County Recorder's Records, being witnessed by a 1 inch iron pin found North $89^{\circ}24'13''$ East, 0.14 feet therefrom;

thence South $89^{\circ}24'13''$ West, along the northerly line of land so conveyed to Kent City School District Board of Education, 611.10 feet to a point on the centerline of Hudson Road, having passed over a 3/4 inch iron pin found at 579.85 feet therefrom;

thence North $16^{\circ}27'43''$ West; along the centerline of Hudson Road, 129.68 feet to the principal place of beginning, containing 76,230 square feet or 1.7500 acres of land according to a survey by Guy P. Haney, P.S. No. S-7631, for Davey Resource Group in February of 2021. Subject to all highways, easements and covenants of legal record.

Bearings are based on Ohio State Plane Coordinate System, North Zone, NAD 1983, ground.

PROJECT SITE #2

PPN: 17-007-00-00-001-003

SITUATED IN THE CITY OF KENT, COUNTY OF PORTAGE AND STATE OF OHIO:

SUB LOT C5R AS SHOWN ON ROAD DEDICATION AND REPLAT OF PART OF BLOCK C AND PART OF BLOCK B OF THE DAVEY INDUSTRIAL PARK RECORDED IN PLAT NUMBER 2002-13 OF THE PORTAGE COUNTY, OHIO OFFICIAL RECORDS.

PROJECT SITE #3

PPN: 04-025-00-00-003-013

Situated in the Township of Brimfield, County of Portage and State of Ohio and known as being part of original Brimfield Township Lot 25 and is further being known as a part of Sub Lot No. 4 and 5 of the Ruggiero Acres Subdivision as is numbered, platted and recorded in Portage County Plat Book 24, Page 27;

Beginning at an iron pipe in the northerly line of Lynn Road TH 99, 60.00' wide, at the southwest corner of Sub Lot No. 5 in the said Ruggiero Acres Subdivision;

Thence along the westerly line of Sub Lot No. 5 N 00 Degrees – 30' W a distance of 499.44 feet to an iron pipe;

Thence N 56 degrees – 13' – 39" E a distance of 237.22 feet to an iron pipe in the easterly line of Sub Lot No. 4 in the said Ruggiero Acres Subdivision;

Thence along the easterly line of the said Sub Lot No. 4 S 00 Degrees – 30' E a distance of 604.02 feet to an iron pipe in the northerly line of Lynn Road;

Thence along the northerly line of Lynn Road S 87 Degrees – 15' 25" W a distance of 6.00 feet to an iron pipe at an angle point in said northerly line;

Thence continuing along the northerly line of Lynn Road S 82 Degrees – 00' W a distance of 194.00 feet to the beginning and containing 2.5108 acres of land be the same more or less but subject to all legal highways as surveyed in January, 1986 by Don Trocchio, Registered Surveyor No. 6445.

PROJECT APPLICATION

City Forest Credits Carbon Preservation Project Application

Project Overview

1. Project Name

Davey Corporate Forest Preservation

2. Project Type

Preservation

3. Project Sites: 3 Total

Project Sites #1 & #2 are located within the city limits of Kent, Ohio and Project Site #3 is located in the unincorporated Brimfield Township. All sites are entirely within the 2010 Census—Urbanized Area Reference Map: Akron, OH. See Appendix A.

https://www2.census.gov/geo/maps/dc10map/UAUC_RefMap/ua/ua00766_akron_oh/DC10UA00766.pdf

4. Project Operator

Organization/Entity: Davey Resource Group, Inc.
Address: 295 South Water Street Suite 300
City: Kent
State: Ohio
Zip: 44240
Contact(s): TJ Mascia
Phone: 252-723-0815
Email: tj.mascia@davey.com

5. Project Description

The Davey Tree Expert Company (Davey) is an employee-owned corporation with business in the United States and Canada, providing expert services in tree care, commercial grounds, and utility and environmental consulting. As the first and largest tree care company in North America, Davey is continually committed to investing in the growth and protection of natural resources. Davey Resource Group, Inc. (DRG), a wholly owned subsidiary of Davey, is submitting this application on behalf of Davey and will serve as the Project Operator.

Since the company's inception, Davey has held education and training as a core value. Our training programs and facilities continue to grow as employee count, service diversity, and the impacts of climate change continue to expand. Davey looks forward to the opportunity to provide staff with the opportunity to receive educational insights and additional training through the protection of these parcels, as well as to provide educational opportunities to the local community through the use of interpretive signage.

As such, Davey is proud to enroll company-owned parcels in a City Forest Credits Preservation project (the Project) and plans to use the preserved tree stands for education on carbon sequestration and co-benefits of urban trees, including training and interpretive signage installation. Through this application, Davey's desire is to expose employees, clients, and our local communities to our commitment to taking positive steps for the climate and showcase the details and process of maintaining a carbon project.

Davey is a growing company with its headquarters located in Kent, Ohio. Between the years of 2010 and 2020 nationwide, Davey increased the number of employees by 2,800, and increased square footage of land for various facilities and offices by 195,594 ft² in the same timeframe. In 2019, Davey's corporate campus removed trees and broke ground on a new wing of the office complex and additional parking spaces to accommodate the support teams necessary for these additional employees. Our company has continued to grow and purchased additional properties in northeast Ohio, including Kent, for office, demonstration, and training facilities.

Davey is proud to enroll company-owned parcels in a City Forest Credits Preservation project.

One of Davey's corporate campus neighbors, Theodore Roosevelt High School, is also growing and developing on their parcels. In 2021, Davey divided one of its parcels and sold the land to the school for their development and use. The remaining portion of that parcel will be dedicated under deed restriction for enrollment in this Project.

The City of Kent, Ohio, home of Kent State University, is growing at a rate of 0.20% and the population has increased by 3.19% over the last ten years. Due to this population increase, there has been substantial growth in new developments, downtown structures, and population.

Within our proposed parcels, the stands are being preserved to protect against development by Davey itself or through the sale and development of the parcels to the community at large. By protecting these tree stands, future employees and the greater community will continue to receive the co-benefits of these trees for years. In addition to this benefit, Davey also gains an opportunity to introduce visiting employees to the process of forest preservation through an active carbon project, educate out of state teams, and provide training and meetings on the topic of forest preservation.

The Project consists of three sites, all located on parcels privately owned by Davey. The trees on these project sites will be preserved under a deed restriction with a minimum term of 40 years. Prior to the preservation commitment, the Project trees were not preserved through a recorded encumbrance or other prohibitions on their removal. Project parcels include:

Project Site #1 | North Mantua Street

Project Site #1 is located on Davey Corporate Campus at 1500 North Mantua Street, Kent, Ohio. This Project site is within parcel 17-043-00-00-013-000.

The land use designation for Project Site #1 is industrial research and office and is not located in an overlay zone that prohibits all development. Greater than 30% of the site perimeter is surrounded by non-forest including residential, school district, agricultural, and commercial properties. This site comprises 8.491 acres of tree stands approximately 80 years old, and the stands are mostly oak (*Quercus spp.*) and hickory (*Carya spp.*)

Project Site #2 | St. Clair Avenue

Project Site #2 is located on St. Clair Avenue, Kent, Ohio. This Project site is within parcel 17-007-00-00-001-003.

The land use designation for Project Site #2 is industrial and the land is currently vacant. The Project site is not in an overlay zone that prohibits all development. Greater than 30% of the site perimeter is surrounded by non-forest including residential, industrial, and commercial properties. This site comprises 9.336 acres of tree stands with 1.983 acres at 25 years old and the remaining 7.353 acres at 55 years old, the stands are mostly oak-hickory.

Project Site #3 | Lynn Road

Project Site #3 is located on Lynn Road in Brimfield Township, Ohio. This Project site is within parcel 04-025-00-00-003-013.

The land use designation for Project Site #3 is residential—medium density and the land is currently vacant. The project site is not located in an overlay zone that prohibits all development. Greater than 30% of the site perimeter is surrounded by non-forest including residential properties and a park. This site comprises 2.262 acres of tree stands, half at 35 years old and half at 65 years old, and the stands are mostly oak-hickory.

6. Project Impacts

Tree canopies provide an array of benefits to the surrounding communities, including greenhouse gas benefits, urban heat island regulation, energy conservation, wind breaks, stormwater benefits including water infiltration and retention, wildlife habitat, and improved air quality. This Project seeks to protect each of these benefits and contribute to improved watershed health within the Cuyahoga River Area of Concern.

Under preservation status, these Project sites will continue to be a respite for Davey employees on work breaks, a safe and pleasant area for the nearby schools' cross country teams daily runs, and an area for employees to continue technical training in the safety, arboriculture, and environmental consulting curricula.

Impacts | Project Site #1

Project Site #1 is less than 0.5 miles from the Cuyahoga River. It is in the northeast side of the Fish Creek-Cuyahoga River watershed, which has "impaired" status. The watershed impairment categories include abnormal flow, bacteria and other microbes, degraded habitat, nitrogen, and/or phosphorus. Preservation of the site will help to protect and promote overall watershed health in addition to providing recreational and community benefits, including but not limited to open space protection, urban heat island reduction and wildlife habitat. These co-benefits will benefit the community at large given the site's accessibility and visibility.

Impacts | Project Site #2

Project Site #2 is approximately 500ft from Plum Creek, a tributary of the Cuyahoga River. It is located in the northern section of the City of Akron-Little Cuyahoga Watershed (HUC 04110002-03-04) which has “impaired” status. The watershed impairment categories include bacteria and other microbes, degraded habitat, and low oxygen. Preservation of the site will help to protect and promote overall watershed health in addition to providing recreational and community benefits, including but not limited to open space protection, urban heat island reduction and wildlife habitat. These co-benefits will benefit the community at large given the site's accessibility and visibility.

Impacts | Project Site #3

Project Site #3 is along the Brimfield Ditch, a tributary of Breakneck Creek. It is in the Feeder Canal-Breakneck Creek sub-watershed (HUC 04110002-02-02) which has “impaired” status. The watershed impairment categories include abnormal flow, bacteria and other microbes, degraded habitat, low oxygen, sediment, and toxic chemicals. Preservation of the site will help to protect and promote overall watershed health in addition to providing recreational and community benefits, including but not limited to open space protection, urban heat island reduction and wildlife habitat. These co-benefits will benefit the community at large given the site's accessibility and visibility.

Portions of the Cuyahoga River are designated Area of Concern within three miles of each Project site. Another goal of this Project is to protect habitat and canopy of the community and nearby Plum Creek, Breakneck Creek, and Cuyahoga River. All Project sites provide habitat for wildlife in areas bordered by mixed land use including agricultural, commercial, industrial, school, parks, and residential. The three sites also provide habitat for a variety of flora and fauna, and most importantly act as a greenway between parks or other nearby forested areas.

Bird and Wildlife Habitat | Project Site: All

All three sites are found in Portage County Ohio and within the county there are a few species of animals that are listed as endangered or threatened. These species include the Indiana Bat (*Myotis sodalis*), the Northern Long-Eared bat (*Myotis septentrionalis*), and the Little Brown Bat (*Myotis lucifugus*). Even though there have not been recent reports of these species in the project sites, all three sites have good habitat for these species. All use oak or hickory trees for maternity roosting. Preserving these habitats is critical for increasing habitat availability for these state-listed bats.

Bird and Wildlife Habitat | Project Site #1

Project Site #1 is located near the greenbelt along the Cuyahoga River and is home to a variety of flora and fauna. During our visit to prepare for carbon quantification, a Cooper's Hawk (*Accipiter cooperii*) was sighted. Flora found on site include Appalachian sedge (*Carex appalachica*), creeping clubmoss (*Lycopodium sp.*), northern spicebush (*Lindera benzoin*), Kalm's lobelia (*Lobelia kalmii*), and rambling dewberry (*Rubus vagus*). Rambling dewberry is listed as an endangered species in Ohio.

Bird and Wildlife Habitat | Project Site #2

Project Site #2 connects the canopy from the City of Kent’s Plum Creek Park to a nearby industrial park and is home to a variety of flora. The site contains star sedge (*Carex echinata*) which is an endangered species in Ohio and eastern tamarack (*Larix laricina*) which is listed as a vulnerable species in Ohio. Preserving this site may lead to the increase of these rare plants, upping the diversity of habitat, and the species that dwell within them.

Bird and Wildlife Habitat | Project Site #3

Project Site #3 is in close proximity to Gougler Park within Brimfield Township. On an iNaturalist query accessed on January 20, 2022, no unique species were documented. The project area is in the Feeder-Canal-Breakneck Creek subwatershed which has “impaired” status.

7. Additional Information

Davey is a company deeply rooted in its commitment to tree care and environmental stewardship. As a part of this commitment, Davey has partnered in the development and dissemination of i-Tree since its inception and provides technical support for the software. With focus on plant health care, invasive species management, and ecological restoration, the preservation of these forest stands at our corporate campus and additional sites demonstrates our desire to preserve the local environment and live out the values of our corporate responsibility.

SECTION 1103.21: I-R: INDUSTRIAL RESEARCH AND OFFICE DISTRICT

(A) Purpose
Purposes of the I-R District is to provide an environment exclusively for and conducive to the development and protection of modern, administrative facilities and research institutions that are office like in physical appearance and service requirements.

(B) Permitted Principal Uses	(C) Conditionally Permitted Uses
1. Accessory Buildings (Section 1106.10:) 2. Banks and Financial Institutions (Excluding Drive-Through Facilities) 3. Business, Non-retail 4. Testing/Experimental/Research Facilities	1. Banks and Financial Institutions (Including Drive-Through Facilities) (Section 1105.08:) 2. Child Day Care Facilities (Section 1105.16:) 3. Hospitals (Section 1105.29:Section 1105.30:) 4. Medical Marijuana, Testing Laboratories (Section 1105.36:) 5. Microbreweries (Section 1105.37:) 6. Temporary Structures (Section 1106.15:) 7. Utilities & Associated Structures (Section 1105.64:)

Where there is a discrepancy between [Section 1103.07:](#) and this table, this table will prevail.

(D) Specially Permitted Uses
None

(E) Dimensional Regulations	
<i>Lot and Building Height standards</i>	
<i>Min. Lot Area</i>	0.5 acre
<i>Max. Density</i>	None
<i>Min. Lot Frontage</i>	80 ft.
<i>Max. Building Height</i>	45 ft.
<i>Front Yard Setbacks</i>	60 ft.
<i>Side Yard Setbacks</i>	25 ft.
<i>Rear Yard Setbacks</i>	50 ft.

(F) Additional Regulations
1. Minimum Side Yard Setbacks and Rear Yard Setbacks. The minimum side yard width and rear yard depth abutting a residential district or a public right-of-way which abuts a residential district must not be less than the yard required in the residential district. The first twenty-five (25) feet abutting the side or rear property line must be landscaped and maintained. The remaining space must be open and not used for any storage other than the parking of vehicles.

<p>Where there is a discrepancy between Section 1103.07: and this table, this table will prevail.</p>	

(D) Special Uses
<ol style="list-style-type: none"> 1. Sexually Oriented Uses and Businesses (Section 1105.56:)

(E) Dimensional Regulations	
<i>Lot and Building Height standards</i>	
<i>Min. Lot Area</i>	0.5 acre
<i>Min. Lot Width at Building Line</i>	100 ft.
<i>Min. Lot Frontage</i>	80 ft.
<i>Max. Building Height</i>	60 ft.
<i>Front Yard Setbacks</i>	50 ft.
<i>Side Yard Setbacks</i>	25 ft.
<i>Rear Yard Setbacks</i>	25 ft.

(F) Additional Regulations	
<p>1. Minimum Side Yard Setbacks and Rear Yard Setbacks. The minimum side yard width and rear yard depth abutting a residential district or a public right-of-way which abuts a residential district is one hundred (100) feet. At least a fifty (50) foot wide strip in the 100-foot yard must be planted and maintained for screening or camouflaging purposes according to the following specifications:</p> <ul style="list-style-type: none"> (a) The fifty (50) foot wide strip must be planted with pine, Norway Spruce, or other plants of similar screening value. (b) Such tree must be planted on a staggered pattern with no more than ten (10) feet between trees. (c) Trees must be of a species and size that will produce within two (2) years a dense screen barrier at least eight (8) feet in height. (d) The fifty (50) foot wide planting strips must be so located as to achieve the greatest screening or camouflaging effect. The dense screen buffer must be maintained and any plant material which does not live must be replaced within one (1) year. The side and rear yard area within the planting strip may be used for off street parking and loading space. 	
<p>2. Additional Height for Inclusion of Parking Garage. A building is permitted to exceed the maximum building height by up to fifteen (15) feet if a parking structure is provided underneath seventy-five percent (75%) of the building's footprint.</p>	

Chapter 5

pond is not considered subject to provisions and federal law under jurisdiction of the U.S. Army Corps of Engineers or any other state or federal laws.

c. Lake Shorelines:

The shoreline of lakes, consisting of the area within one-hundred (100) feet from the shorelines, shall contain no more than fifteen (15) percent impervious surfaces. At least seventy-five (75) percent of all such areas shall be permanent open space.

d. Pond Shorelines:

The shorelines of ponds consisting of the area within fifty (50) feet from the shoreline shall contain no more than fifteen (15) percent impervious surfaces. At least seventy-five (75) percent of all such areas shall be permanent open space.

e. Drainage Ways/Ditches:

There shall be no alteration, filling, dredging or damming of any stream or drainage way without submission and review of such plan to: Township Trustees, County Engineer, Portage Soil and Water Conservation District Office, U.S. Army Corps of Engineers. Proof of the positive impacts on such action will be required to be submitted. No such action shall occur until approvals have been granted by the appropriate above authorities.

Section 510.00 General Regulations

Section 510.01 Lots, Yards and Open Space Areas

A. Required Lots, Yards, and Open Space

No area of land that has been counted or calculated as part of a side yard, rear yard, front yard, or other open space that is required by this Resolution may be counted or calculated to satisfy the yard or other open space requirement of or for any other building.

B. Usable Open Space

Whenever required by this Resolution, usable open space shall be unobstructed to the sky and shall not be used as service driveways or off-street parking and/or loading areas.

C. Substandard Lots

See Section 520.00.

D. Projections Into Yard Areas

Chapter 5

1. Terraces, porches, platforms or other ornamental features, whether covered or uncovered, which do not extend more than two (2) feet above the level of the ground, may project into a required side yard, provided these projections remain a distance of at least twelve (12) feet from the adjacent property lot line to allow passage of emergency vehicles and fire apparatus.
2. The ordinary projections of balconies, chimneys or flues, and similar architectural projections shall be considered parts of the building to which they are attached and shall not project into the required minimum front, side, or rear yard.

E. Reduction of Area or Space

1. No lot, yard, parking area, or other space shall be reduced in area or dimension if such reduction has the effect of making the lot, yard, parking area, or other space less than the minimum required by this Resolution.
2. Any lot, yard, parking area, or other space which is already less than the required minimum shall not be reduced further.
3. Nothing contained in this Section shall be interpreted to limit the powers of the Board of Zoning Appeals for granting variances under this Resolution.

F. Construction in Easements

1. Easements for installation, operation and maintenance of utilities and drainage facilities are to be reserved as shown on each plat when recorded or otherwise established.
2. Within these easements, no permanent building or structure shall be placed or permitted which may damage or which may interfere with the installation, operation, and maintenance of such utilities or which may change the normal direction of flow of drainage channels within the easement.
3. The easement area of each lot, and any improvements within it, shall be maintained continuously by the owner of the lot, except for those improvements for which a public authority or a utility is responsible.

G. Corner Lots or Lots with Any Number of Yards Fronting on a Street

1. Required Yards Facing Streets

On a corner lot or a lot with any number of yards fronting on a street, the principal building and its accessory structures shall be required to have the same setback distance from all street rightofway lines as required for the front yard in the zoning district for which such structures are located.

2. Visibility at Corner Lots

No obstruction to view in excess of two (2) feet in height shall be placed on any corner lot within a triangular area formed by the street right-of-way lines and a line connecting them at points thirty (30) feet from the intersection of the street lines, except that shade trees which are pruned at least eight (8) feet above the established grade of the roadway so as not to obstruct clear view by motor vehicle drivers (See Figure 510.01.G.2).

Figure 510.01.G.2

H. Side and Rear Yard Requirements for Nonresidential Uses Abutting Residential Districts

Unless otherwise specified in this Resolution, any nonresidential building or use that is located or conducted on a commercially or industrially zoned parcel of land shall be no closer than forty (40) feet to any lot line of a residential district of which at least twenty (20) feet shall be landscape buffer.

1. (Deleted 7/5/2006) (#2006-249)

J. Maximum Lot Coverage

Except as otherwise specified in this Resolution, the maximum lot coverage per parcel to be covered by buildings and impervious surfaces shall not exceed the following percentages of the total lot area. The balance of the lot shall be grassy yards and landscaped.

1. Lots less than 1/2 acre in size: 50% Lot Coverage.
2. Lots of 1/2 acre to 1 acre in size: 40% Lot Coverage.
3. Lots over 1 acre to 1-1/2 acres in size: 30% Lot Coverage.
4. Lot over 1 1/2 acres in size: 20% Lot Coverage.
5. On major traffic arterials, State Route 43 and Tallmadge, within the Town Center District, the maximum lot coverage per parcel covered by buildings and other impervious surfaces shall not exceed

- b. Provide landscaped islands a minimum of nine (9) feet wide between every ten to fifteen (10-15) spaces that shall include shade trees. There shall be one shade tree planted and maintained on every island.
- c. All trees shall be no less than two-inches (2") diameter as measured twelve-inches (12") above grade. Each tree shall be provided with at least forty (40) square feet of unpaved area around its trunk.

2. General Guidelines for All Parking Lots

- a. Use deciduous shade trees with ground cover or low shrubs as the primary landscape material within parking lots. Avoid tall shrubs or low branching trees that will restrict visibility.
- b. For planted islands that are parallel to spaces, islands should be a minimum of nine (9) feet wide to allow doors to open.
- c. For planted islands that are perpendicular to spaces, islands should be a minimum of eight (8) feet wide to allow for overhang of parked cars. If parking is only on one side of the island, an eight foot wide planted island is still required.

- 3. In large parking lots, separate pedestrian walkways are to be provided to allow safe movement within the lot. These walkways should generally be oriented perpendicular to and between parking bays. Adjacent to the walks, trees should be planted. These plantings will aid in the identification of walkway locations within the lot and in providing erosion control and shade for the pedestrian.

Section 800.13 Enforcement and Maintenance

All plant material shall be installed within eighteen (18) months following the issuance of a Certificate of Zoning Compliance. The property owner shall ensure the proper maintenance of all plant material. If any plant material dies, the property owner must replace it. Failure to replace dead, or diseased plants constitutes a zoning violation subject to the penalty provisions of this Resolution.

Section 800.14 Tree Preservation and Care During Construction

- A. Every effort shall be made during construction to preserve existing healthy trees and shrubs on the site.
- B. Preservation of trees and vegetation of special significance due to size, age, habitat, or historical significance is highly encouraged.
- C. A mature tree, tree mass or woodland should remain on the site providing its does not pose any undue threat to the health, safety and welfare by its location with respect to any proposed improvements to the site.

- D. Mature trees, tree masses, or woodlands which the applicant intends on saving shall be designated "Tree Save Area" on landscaping plans.
- E. All "tree save areas" shall be unmistakably delineated in the field so that it is obvious to all equipment operators and other construction personnel. A temporary physical barrier such as a snow fence shall be erected a minimum of one foot outside the drip line on all sides of individual trees, trees masses or woodlands prior to major clearing or construction. The barrier shall be placed to prevent the disturbance to or compaction of soil inside the barrier, and shall remain until construction is complete. The barrier shall be shown on the landscape plan.
- F. The following practices are considered harmful in a "tree save area":
1. Grading or trenching.
 2. Placing backfill near trees.
 3. Driving or parking equipment in "tree save" areas.
 4. Dumping of trash.
 5. Storage of construction materials and supplies
- G. Mature trees, tree masses, or woodlands which the applicant intends on removing shall be designated "To Be Removed" on landscaping plans.
- H. The applicant shall justify the removal of any mature trees, tree masses and woodlands. The applicant must make evident that the vegetation removal is minimized by showing that no alternative site layouts are possible, and that no alternative clearing or grading plan would reduce the loss of mature trees, tree masses and woodlands.
- I. Transplanting Existing Plant Material: Specimen trees or individual trees moved from woodlands or tree masses designated "To Be Removed" may be transplanted from one area of the site to another.
- J. Trees to be saved should be selected prior to siting the buildings, parking lots and other site improvements. Factors to consider include: existing and proposed grading, age, condition and type of tree, location of site improvements and utility connections.
- K. Grading should be done in a manner to avoid destruction and damage to trees and tree stands. Grading must take existing drainage patterns into consideration and the disruption of those patterns minimized.

C. Minimum Lot Width at Minimum Building Setback Line for Lots: One-hundred-fifty (150) feet.

D. Minimum Rear Yard Width: Fifty (50) percent of required frontage

E. Minimum Front Yard Setback

1. Lots with partial or no frontage on a cul-de-sac circle: Fifty (50) feet

2. Lots with total frontage on a cul-de-sac circle:

The distance at which a one-hundred-fifty (150) feet lot width is achieved, as measured along a straight line intersecting both side lot lines an equal distance from the road right-of-way, however, the minimum front yard setback can not be less than fifty (50) feet from the road rightof-way.

F. Minimum Rear Yard Depth: Twenty-five (25) feet.

G. Minimum Side Yard Width: Fifteen (15) feet for each side.

H. Maximum Building Height:

1. Main building: Thirty-five (35) feet

2. Accessory buildings: As specified in Section 510.03

Section 303.04 Minimum Living Floor Area Per Dwelling Unit

Minimum living floor area per residential dwelling shall be in accordance with Section 514.00.

Section 303.05 Maximum Lot Coverage

Maximum lot coverage per parcel shall be in accordance with Section 510.01.J.

Section 303.06 Parking and Loading Requirements

Parking and loading requirements as specified in Chapter 6.

Section 303.07 Landscape Buffering

Landscape buffering shall be in accordance with the provisions of Chapter 8.

Section 304.00 Residential District (R-2)

Section 304.01 Purpose

The purpose of the Residential R-2 Zoning District is to provide for medium density residential development in a semi-suburban character in areas generally adjacent to built-up portions of the community in order to prevent excessive demands on sewerage and water systems, streets, schools and other community facilities and services.

Section 304.02 Uses

Within the R-2 Zoning District, no building, structure, or premises shall be used, arranged to be used, or designed to be used except for one or more of the following uses:

A. Permitted Uses:

1. Single-family dwellings.
2. Home Occupations in accordance with the provisions of Section 515.00.
3. Accessory buildings and uses incidental to primary use. Such uses shall be situated on the same lot with the principal building and conform with the purpose of the R-2 Zoning District.
4. Signs as regulated in Chapter 7.

B. Conditionally Permitted Uses

1. Animal Hospitals, Veterinary Offices and Clinics, subject to the provisions of Chapter 4 and Section 400.10.B subsection 37.
2. Cemeteries subject to the provisions of Chapter 4 and Section 400.10.B subsections 7, 9, 40.
3. Churches and their related buildings and other buildings for the purpose of religious worship subject to the provisions of Chapter 4 and Section 400.10.B subsection 41.
4. Congregate Care/Assisted Living Facilities, subject to the provisions of Chapter 4 and Section 400.10.B subsection 42.
5. Day Care Centers, to include Type A Family Day-Care Home and Children and Adult Day Care Centers, subject to the provisions of Chapter 4 and Section 400.10.B subsection 44.
6. Funeral Home subject to the provisions of Chapter 4 and Section 400.10.B subsections 4, 7, 48.
7. Home Based Businesses, subject to the provisions of Chapter 4 and Section 400.10.B subsection 50.

8. Planned Residential Developments, subject to the provisions of Chapter 4 and Section 400.10.B subsection 56.
9. Public and private elementary schools, subject to the provisions of Chapter 4 and Section 400.10.B subsections 4, 6, 12, 16, 61.
10. Public and private high schools and institutions of higher education, subject to the provisions of Chapter 4 and Section 400.10.B subsections 4, 6, 12, 16, 61.
11. Public and private parks and playgrounds, subject to the provisions of Chapter 4 and Section 400.10.B subsections 2, 4, 5, 6, 12, 54.
12. Public and private golf courses (except miniature golf) and associated dining facilities, subject to the provisions of Chapter 4 and Section 400.10.B subsections 1, 2, 4, 5, 6, 8, 12, 54.
13. Publicly owned and/or operated buildings and service facilities (other than those listed in Items 9, 10, 11 and 12 of this subsection), subject to the provisions of Chapter 4 and Section 400.10.B subsections 1, 4, 5, 8, 12, 59.
14. Wireless telecommunication service facilities proposed by a public utility company and subject to local zoning procedures; subject to the provisions of Chapter 4 and Section 400.10.B subsection 63.

Section 304.03 Area, Yard and Height Requirements

- A. Minimum Lot Area: One (1) acre, exclusive of road right-of-way.
- B. Minimum Frontage on a Street:
 1. Lots with partial or no road frontage on a cul-de-sac circle: One-hundred-twenty-five (125) feet
 2. Lots with total road frontage on a cul-de-sac circle: Sixty (60) feet.
- C. Minimum Lot Width at Minimum Building Setback Line for Lots: One-hundred-twenty-five (125) feet.
- D. Minimum Rear Yard Width: Fifty (50) percent of required frontage
- E. Minimum Front Yard Setback:
 1. Lots with partial or no road frontage on a cul-de-sac circle: Fifty (50) feet.
 2. Lots with total road frontage on a cul-de-sac circle:

The distance at which a one-hundred-twenty-five (125) feet lot width is achieved, as measured along a straight line intersecting both side lot lines an equal distance from the road right-of-way, however, the minimum front yard setback can not be less than fifty (50) feet from the road rightofway.

- F. Minimum Rear Yard Depth: Twenty-five (25) feet.
- G. Minimum Side Yard Width: Fifteen (15) feet for each side.
- H. Maximum Building Height:
 - 1. Main building: Thirty-five (35) feet
 - 2. Accessory buildings: As specified in Section 510.03

Section 304.04 Minimum Living Floor Area Per Dwelling Unit

Minimum living floor area per residential dwelling shall be in accordance with Section 514.00.

Section 304.05 Maximum Lot Coverage

Maximum lot coverage per parcel shall be in accordance with Section 510.01.J.

Section 304.06 Parking and Loading Requirements

Parking and loading requirements as specified in Chapter 6.

Section 304.07 Landscape Buffering

Landscape buffering shall be in accordance with the provisions of Chapter 8.

Section 305.00 Residential District (R-3)

Section 305.01 Purpose

The Residential R-3 Zoning District is established to provide for medium-high density residential development in built-up portions of the community and thereby provide for the orderly extension of public facilities by encouraging development to take place in these areas at densities up to two (2) dwelling units per net acre.

Section 305.02 Uses

Site 3, Schedule of Residential Zoning Districts

**Brimfield Township
Appendix D**

SCHEDULE OF RESIDENTIAL ZONING DISTRICTS¹

	Open Space Conservation District	Rural Residential District	R-1 Residential District	R-2 Residential District	R-3 Residential District	R-4 Residential District
Minimum Lot Size ²	5.0 acres	3.0 acres	1.5 acres	1.0 acres	0.5 acres	10,890 square feet
Minimum Density of Use	single-family dwelling unit	single-family dwelling unit	single-family dwelling unit	single-family dwelling unit	single-family dwelling unit	single-family dwelling unit
Minimum Lot Width	300 feet	250 feet	150 feet	125 feet	100 feet	80 feet
Minimum Lot Frontage	300 feet	250 feet	150 feet	125 feet	100 feet	80 feet
On cul de sac	100 feet	100 feet	60 feet	60 feet	50 feet	
Minimum Front Setback from R-O-W	100 feet	50 feet	50 feet	50 feet	50 feet	50 feet
Minimum Rear Setback						
1. Adjacent to lots non-residential use	50 feet	25 feet	25 feet	25 feet	25 feet	25 feet.
2. Adjacent to a residential use	50 feet	25 feet	25 feet	25 feet	25 feet	25 feet
Minimum Side Yard Setback						
1. Adjacent to a non-residential use	25 feet each side	15 feet each side	15 feet each side	15 feet each side	15 feet each side	12 feet each side
2. Adjacent to a residential use	25 feet each side	15 feet each side	15 feet each side	15 feet each side	15 feet each side	12 feet each side
Maximum Impervious Surface Area	20%	20%	30%	40%	40%	50%

¹ All the information listed on this Table has to do with the minimum requirements for a single-family residential dwelling. For additional information refer to the Zoning District's specific requirements listed in Chapter 3 of this Resolution.

² Exclusive of road right-of-way.

Attestation of No Double Counting and No Net Harm

Davey Corporate Forest Preservation Attestation of No Double Counting of Credits & No Net Harm

I am the Director of Davey Mitigation of the Davey Resource Group, Inc. and make this attestation regarding the no double counting of credits and no net harm from this tree preservation project, Davey Corporate Forest Preservation.

1. Project Description

The Project that is the subject of this attestation is described more fully in both our Application and our Project Design Document (PDD), both of which are incorporated into this attestation.

2. No Double Counting by Applying for Credits from another Registry

Davey Resource Group, Inc. has not and will not seek credits for CO₂ for the project trees or for this project from any other organization or registry issuing credits for CO₂ storage.

3. No Double Counting by Seeking Credits for the Same Trees or Same CO₂ Storage

Davey Resource Group, Inc. has not and will not apply for a project including the same trees as this project nor will it seek credits for CO₂ storage for the project trees or for this project in any other project or more than once.

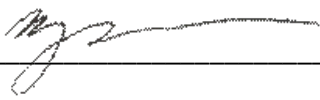

4. No Net Harm

The trees preserved in this project will produce many benefits, as described in our Application and PDD. Like almost all urban trees, the project trees are preserved for the benefits they deliver to people, communities, and the environment in a metropolitan area.

The project trees will produce many benefits and will not cause net harm. Specifically, they will not:

- Displace native or indigenous populations
- Deprive any communities of food sources
- Degrade a landscape or cause environmental damage

Attestation of Additionality

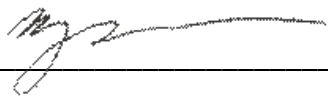

Davey Corporate Forest Preservation Attestation of Additionality

I am the Director of Davey Mitigation of the Davey Resource Group and make this attestation regarding additionality from this tree preservation project, Davey Corporate Forest Preservation.

- Project Description
 - The Project that is the subject of this attestation is described more fully in our Application and our Project Design Document (PDD), both of which are incorporated into this attestation.
- Prior to the start of the project, the trees in the project area were not protected via easement or recorded encumbrance or in a protected zoning status that preserves the trees
- The zoning in the project area currently allows for a non-forest use
- The trees in the project area face a threat or risk of removal or conversion out of forest
- Davey Tree Expert Company recorded in the public land records an easement, covenant, or deed restriction specifically protecting the trees for the project duration of 40 years
- Additionality is also embedded in the quantification methodology that our project followed. Projects cannot receive, and our project will not receive, credits for trees that would have remained had development occurred, nor can they receive soil carbon credits for soil that would have been undisturbed had development occurred. Our project also had to apply a discount to credited carbon for potential displaced development due to the project.
- Project Implementation Agreement for Project Duration
 - Davey Resource Group signed a Project Implementation Agreement with City Forest Credits for 40 years.

Signed on November 22 in 2022, by T.J. Mascia, Director, Davey Mitigation for Davey Resource Group.

Carbon Quantification Summary

21.402	Total Project Area Acres
56.23	Biomass tC/ac
206.16	Biomass tCO _{2e} /ac
4,412	Accounting Stock, tCO _{2e}
90%	Fraction at risk of tree removal
3,971	Avoided Biomass Emissions, tCO _{2e}
	Avoided impervious surface
16.241	Avoided impervious surface, acres
1,949	Avoided Soil Carbon Emissions, tCO _{2e}
18.3%	Displacement
727	Displaced Biomass Emissions, tCO _{2e}
591	Displaced Soil Emissions
3,244	Credits from Avoided Biomass Emissions, tCO _{2e}
1,358	Credits from Avoided Soil Emissions, tCO _{2e}
4,603	Total Credits attributed to the project, tCO _{2e}
460	Registry Reversal Pool Account (10%), tCO _{2e}
4,143	Total credits issued to the project, tCO_{2e}
194	Total credits issued to the project, tCO_{2e}/acre

Protocol Section Supporting Information provided in the Project Design Document and Appendices

Three sites in the Project Area, with acreage as follows: 1) 8.972, 2) 9.92, and 3) 2.51

11.1.B A complete inventory was performed on all trees within the project area that had a diameter at breast height of 5 inches or more, corresponding to method 11.1.B ,

11.1.B

11.1.B

11.2 The three sites in the Project Area are zoned as follows: 1) Industrial Research & Office, 2) Industrial, and 3) R-2 Residential; see Appendix H

11.2

11.4 The three sites in the Project Area allow impervious surface as follows: 1) 90%, 2) 73%, and 3) 30%; see Appendix N

11.4

11.4

11.5 Fraction of avoided development that cannot be served by development or re-development of existing non-treed properties within the urban area

Assumes that redevelopment causes increase in impervious surface on redeveloped parcels

Stratum	Carbon Storage (metric ton)	Carbon Storage (%)	CO₂ Equivalent (metric ton)
West Campus	779.40	64.8%	2857.80
St Clair	314.50	26.1%	1153.00
Lynn Rd	109.50	9.1%	401.60
Study Area	1203.40	100%	4412.30

Due to limits of available models, i-Tree Eco will limit carbon storage to a maximum of 7,500 kg (16,534.7 lbs) and not estimate additional storage for any tree beyond a diameter of 254 cm (100 in). Whichever limit results in lower carbon storage is used.

Carbon Storage by Stratum

Tree Characteristics Chart(s)

Appendix L

Site 1

Davey Corporate Forest Preservation

I. Tree Characteristics of the Urban Forest

The urban forest of Davey's Campus property has 1,285 trees with a tree cover of 140.5 percent. The three most common species are maple spp (51.1 percent, plum spp (23.4 percent), and oak spp (9.1 percent).

Figure 1. Tree species composition in Davey's Campus Property

Appendix L

Site 2

Davey Corporate Forest Preservation

I. Tree Characteristics of the Urban Forest

The urban forest stand of St. Clair has 2,449 trees with a tree cover of maple (*Acer*) species. The three most common species are maple (*Acer*) species, oak (*Quercus*) species, and black cherry (*Prunus serotina*).

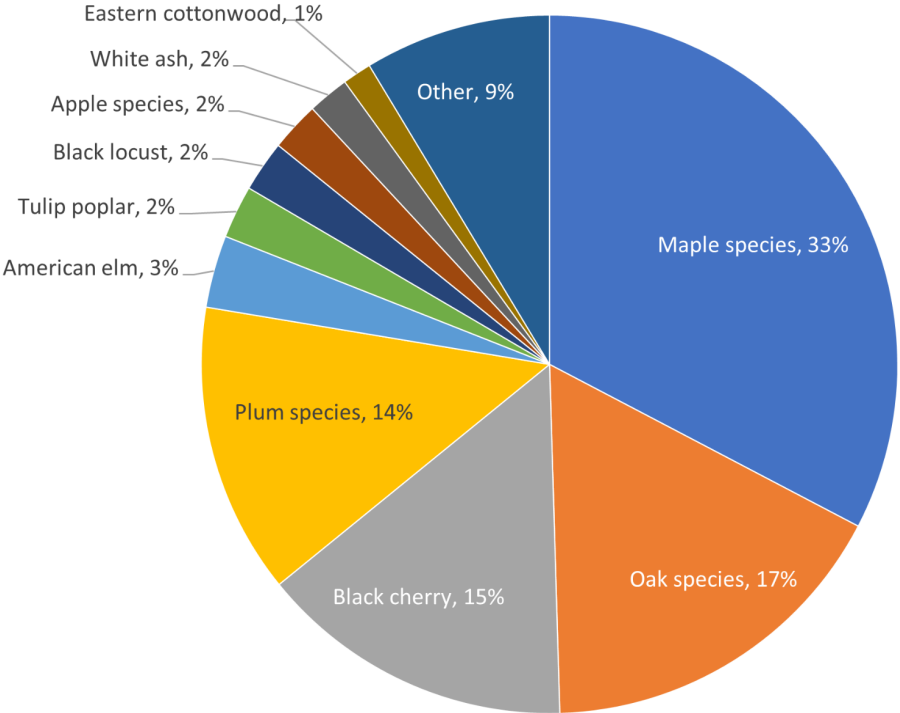

Figure 1. Tree species composition in Davey's St. Clair Property

Appendix L

Site 3

Davey Corporate Forest Preservation

I. Tree Characteristics of the Urban Forest: The urban forest of Davey's Lynn Rd property has 215 trees with a tree cover of 83.8 percent. The three most common species are Tulip tree (17.7 percent), black locust (17.2 percent), and maple spp (15.8 percent).

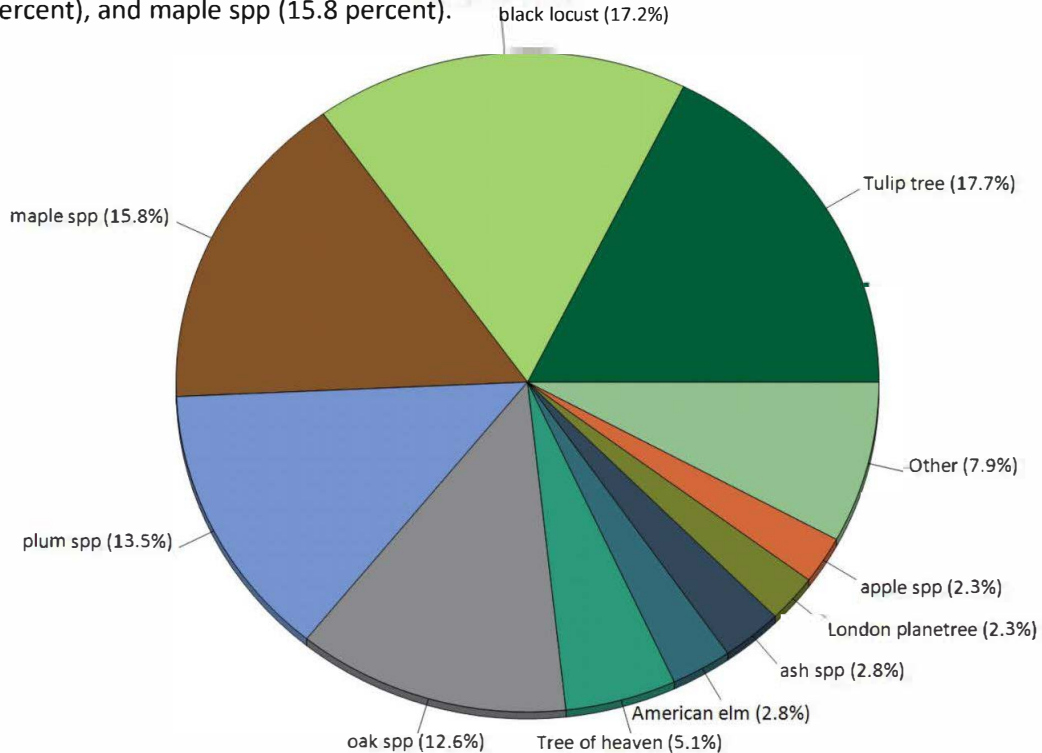

Figure 1. Tree Species Composition in Davey's Lynn Rd Property

Appendix Q

Site 1, Photos May 2022

Davey Corporate Forest Preservation

The forest stand at Site 1, in Kent, Portage County, Ohio, is approximately 80 years of age. It is dominated by maple (*Acer* spp.), cherry and plum (*Prunus* spp.), and oak (*Quercus* spp.) tree species.

Appendix Q

Site 2, Photos May 2022

Davey Corporate Forest Preservation

Site 2, in Kent, Portage County, Ohio, is divided into two forest stands approximately 55 and 25 years of age. The stands are characterized by black cherry (*Prunus serotina*), oak (*Quercus spp.*), maple (*Acer spp.*), American elm (*Ulmus americana*), apple (*Malus spp.*), and Callery pear (*Pyrus calleryana*).

Appendix Q

Site 3, Photos May 2022

Davey Corporate Forest Preservation

The forest stand at Site 3, in Brimfield Township, Portage County, Ohio, ranges from 35 to 65 years of age. It is dominated by tulip tree (*Liriodendron tulipifera*), black locust (*Robinia pseudoacacia*), maple (*Acer* spp.), black cherry (*Prunus serotina*), and oak (*Quercus* spp.)

About i-Tree Canopy

The concept and prototype of this program were developed by David J. Nowak, Jeffery T. Walton, and Eric J. Greenfield (USDA Forest Service). The current version of this program was developed and adapted to i-Tree by David Ellingsworth, Mike Binkley, and Scott Maco (The Davey Tree Expert Company)

Limitations of i-Tree Canopy

The accuracy of the analysis depends upon the ability of the user to correctly classify each point into its correct class. As the number of points increase, the precision of the estimate will increase as the standard error of the estimate will decrease. If too few points are classified, the standard error will be too high to have any real certainty of the estimate.

Directions

- 1) Use i-Tree Canopy, or another tool, to estimate the amount of deciduous and coniferous tree cover area (acres) (Cell C20 and D20).
- 2) Use i-Tree Canopy, or another tool, to estimate the amount of non-tree cover area (acres) (Cell F20) in the project area.
- 3) In Cell G20 the total area of the project is calculated (acres). Prompt i-Tree Canopy to provide an estimate of the project area by clicking on the gear icon next to the upper right portion of the image and selecting "Report By Area."
- 4) Total Project Area, cell G17 should equal 100%.

Social Impacts

Appendix P Social Impacts

Davey Corporate Forest Preservation

Davey Corporate Forest Preservation

Social Impacts

UN Sustainable Development Goals

The 17 United Nations Sustainable Development Goals (SDGs) are an urgent call for action and global partnership among all countries, representing key benchmarks for creating a better world and environment for everyone. Well-designed and managed urban forests make significant contributions to the environmental sustainability, economic viability and livability of cities. They help mitigate climate change and natural disasters, reduce energy costs, poverty and malnutrition, and provide ecosystem services and public benefits. See more details in the CFC Carbon Project Social Impact Reference Guide.

Instructions

This template sets out all relevant SDGs and lists various urban forest project activities that fall within each SDG. Evaluate the SDGs to determine how your carbon project provides social impacts that may contribute towards achievement of the global goals. Check the box(es) that contain one of your project activities and describe in no fewer than two sentences how your project activities align with the corresponding SDG. On page 12, select the icon for three to five of the most relevant SDGs to your project and provide any additional information.

SDG 3 - Good Health and Well Being

Goal: Ensure healthy lives and promote well-being for all at all ages. Examples of project activities include, but are not limited to:

- X Plant or protect trees to reduce or remove air pollutants
 - If planting trees, select trees for reduced pollen counts and irritant production
- X Plant or protect trees to create shade, provide UV exposure protection, reduce extreme heat negative effects, and/or reduce temperatures to relieve urban heat effects
- X Design project to buffer sounds, optimize biodiversity, or create nature experiences
 - Locate project near vulnerable populations, such as children or elderly
- X Locate project near high volume roads to screen pollutants
- X Locate project near people to encourage recreation, provide new parks or green space, or otherwise promote an active lifestyle
 - Locate project near schools, elderly facilities, or mental health services to promote nature-based wellness, attention restoration, or other mental well-being
- X Locate project in area with conditions of project-defined high inequity to trees, such as at schools, affordable or subsidized housing, formerly redlined neighborhoods, areas with high property vacancy rates, or area with high proportion of renters
- X Reduce stormwater runoff or improve infiltration rates
- X Design project to reduce human exposure to specific pollutants or toxins
 - Other

Tree canopy provides an array of benefits to surrounding communities, including cleaner air and water, cooler temperatures, energy savings, and reduced flooding. The Project Area is located within a growing urban area where residents are particularly vulnerable to poor air quality and urban heat island effect. Tree canopy in the project area will provide cleaner air, energy savings, and cooler temperatures to help mitigate these effects on vulnerable populations including renters, residents who live in poverty, and residents over age 65. In addition, the Cuyahoga River is a major local source of recreation for Kent and the surrounding area. Tree canopy preservation will help protect the river for fishing, paddling, and walking/running along trails that extend through downtown Kent.

SDG 6 - Clean Water and Sanitation

Goal: Ensure availability and sustainable management of water and sanitation for all. Examples of project activities include, but are not limited to:

- Research and assess environmental injustices related to water in project area

- X Locate project near high-traffic roads or to otherwise improve, mitigate, or remediate toxic landscapes near water
 - Protect or plant trees to improve historically or culturally important sites related to water that have been degraded and/or neglected
- X Reduce stormwater by planting or protecting trees
- X Plant forested buffers adjacent to streams, rivers, wetlands, or floodplains
 - Prevent soil erosion by protect steep slopes
- X Improve infiltration rates
 - Improve, mitigate, or remediate toxic landscapes and human exposure to risk
 - Drought resistance, such as selecting appropriate water-efficient trees for project climate zone
- X Other: Address beneficial use impairments within an Area of Concern.

The Project Area is situated within the Cuyahoga River Area of Concern. Stormwater benefits through tree preservation will help with filtration of the water that is being fed into the impaired Cuyahoga River watershed, which is a significant local recreation site for kayaking, swimming, and fishing. Beneficial use impairments of the Cuyahoga River include degradation of fish and wildlife populations, loss of fish habitat, and beach closings farther downriver. Preservation of these sites will help to protect and promote overall watershed health.

SDG 10 - Reduced Inequalities

Goal: Reduce inequalities within and among countries. Examples of project activities include, but are not limited to:

- Provide connections and cohesion for social health, such as create or reinforce places that promote informal interactions, engage local residents and users in tree management, include symbolic or cultural elements, or other events
- Research, understand, and design to address understand historic and current sociocultural inequities, community health conditions, environmental injustices, or prior local greening efforts in community
- X Locate project near vulnerable populations, such as children or elderly, to provide air quality improvements or buffer against extreme heat effects
 - Locate project in high-density residential areas or where there is a lack of trees to improve access and promote an active lifestyle
 - Locate project near schools, elderly facilities, or mental health services to promote nature-based wellness, attention restoration, or other mental well-being
- X Locate project in area with conditions of project-defined high inequity to trees, such as at

schools, affordable or subsidized housing, formerly redlined neighborhoods, areas with high property vacancy rates, or area with high proportion of renters

- X Locate project near high-traffic roads or to otherwise improve, mitigate, or remediate toxic landscapes
- Protect or plant trees to improve historically or culturally important sites that have been degraded and/or neglected
- Community engagement in project design, including such things as engaging and respecting existing relationships and social networks, community cultural traditions, and public participation methods that are empowering and inclusive
- Community participation in project implementation, including such things as addressing and removing barriers to participation, promote ongoing community-based care and access to financial resources
- Emphasize local hiring and support small businesses
- Research and consider potential for gentrification and displacements
- Promote local economic opportunities through workforce training, career pathway development, or other employment
- Other

The project will also contribute to social co-benefits in the city of Kent and surrounding Portage County. Per the 2020 U.S. Census, 24% of Kent residents live below the poverty line, compared to a county average of 10% and a state average of 13%.

As a college town, Kent also has a high proportion of rental properties—59% percent of occupied houses are rentals, compared to 29% in Portage County and 34% in Ohio. As noted in a 2022 report from Joint Center for Housing Studies of Harvard University, “America’s Rental Housing”, renter households are particularly vulnerable to the effects of climate change. Tree canopy preservation will help mitigate flooding risk and urban heat island effect for vulnerable populations in Kent.

SDG 11 - Sustainable Cities and Communities

Overall: Make cities inclusive, safe, resilient, and sustainable. Examples of project activities include, but are not limited to:

- X Plant or protect trees to reduce or remove air pollutants
 - If planting trees, select trees for reduced pollen counts and irritant production
 - Locate project near high volume roads to screen pollutants
- X Locate project near vulnerable populations, such as children or elderly
- X Plant or protect trees to create shade, provide UV exposure protection, reduce extreme heat negative effects, and/or reduce temperatures to relieve urban heat effects

- Locate project near people to encourage recreation, provide new parks or green space, or otherwise promote an active lifestyle
- Design project to improve wellness and mental health, such as planting trees to buffer sounds, optimize biodiversity, optimize views from buildings, or create nature experiences
- Locate project near schools, elderly facilities, or mental health services to promote nature-based wellness, attention restoration, or other mental well-being
- Provide connections and cohesion for social health, such as create or reinforce places that promote informal interactions, engage local residents and users in tree management, include symbolic or cultural elements, or other events
- Research, understand, and design to address understand historic and current sociocultural inequities, community health conditions, environmental injustices, or prior local greening efforts in community
- Locate project in area with conditions of project-defined high inequity to trees, such as at schools, affordable or subsidized housing, formerly redlined neighborhoods, areas with high property vacancy rates, or area with high proportion of renters
- Community engagement in project design, including such things as engaging and respecting existing relationships and social networks, community cultural traditions, and public participation methods that are empowering and inclusive
- Community participation in project implementation, including such things as addressing and removing barriers to participation, promote ongoing community-based care and access to financial resources
- Other

In the growing city of Kent, this project is an important part of equalizing health disparities and making the surrounding urbanized area more resilient to climate change. Tree preservation will benefit local residents by providing energy savings, cleaner air and water, and improved human health, contributing to the goal of making cities inclusive, safe, resilient, and sustainable. Local vulnerable populations include renters and residents who live in poverty.

SDG 12 - Responsible Production and Consumption

Goal: Ensure sustainable consumption and production patterns

Examples of project activities include, but are not limited to:

- Plant or protect trees to create shade or reduce temperatures to relieve urban heat effects
- Provide cooling benefits and energy savings by shading impervious surfaces such as streets or parking lots, or planting trees on south and west sides of buildings
- Other

Tree preservation within the Project Area will help mitigate urban heat island effects by cooling temperatures in a growing urbanized area.

SDG 13 - Climate Action

Goal: Take urgent action to combat climate change and its impacts.

Examples of project activities include, but are not limited to:

- Plant or protect trees to reduce or remove air pollutants
- Plant or protect trees to create shade or reduce temperatures to relieve urban heat effects
- Promote community capacity for social and climate resilience by engaging local residents or users in tree management, or other events to connect people to the project
- Reflect cultural traditions and inclusive engagement for climate resilience
- Design project to improve soil health
- Provide cooling benefits and energy savings by shading impervious surfaces such as streets or parking lots, or planting trees on south and west sides of buildings
- Plant or protect trees to reduce stormwater runoff
- Select water-efficient trees for climate zone and drought resistance
- Create and/or enhance wildlife habitat
- Other

Tree canopies provide many benefits to surrounding communities including greenhouse gas benefits, as well as urban heat island mitigation. These parcels also have endangered species nearby that may use these tree stands as possible habitat.

SDG 15 - Life on Land

Goal: Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss.

Examples of project activities include, but are not limited to the following with increased functionality of green infrastructure:

- Plant or protect trees to reduce stormwater runoff
- Select water-efficient trees for climate zone and drought resistance

- X Create and/or enhance wildlife habitat to improve local biodiversity
- X Plant forested buffers adjacent to streams, rivers, wetlands, or floodplains
- Prevent soil erosion by protect steep slopes
- X Improve infiltration rates
- Other

The Project Area is situated within the Cuyahoga River Area of Concern. Stormwater benefits through tree preservation will help with filtration of the water that is being fed into the impaired Cuyahoga River watershed, which is a significant local recreation site for kayaking, swimming, and fishing. Beneficial use impairments of the Cuyahoga River include degradation of fish and wildlife populations, loss of fish habitat, and beach closings farther downriver. Preservation of these sites will help to protect and promote overall watershed health.

Summary of Project Social Impacts

SDG 3. Good Health and Well-Being. Tree canopy provides an array of benefits to surrounding communities, including cleaner air and water, cooler temperatures, energy savings, and reduced flooding. The Project Area is located within a growing urban area where residents are particularly vulnerable to poor air quality and urban heat island effect. Tree canopy in the project area will provide cleaner air, energy savings, and cooler temperatures to help mitigate these effects on

vulnerable populations including renters, residents who live in poverty, and residents over age 65. In addition, the Cuyahoga River is a major local source of recreation for Kent and the surrounding area. Tree canopy preservation will help protect the river for fishing, paddling, and walking/running along trails that extend through downtown Kent.

SDG 6. Clean Water and Sanitation. The Project Area is situated within the Cuyahoga River Area of Concern. Stormwater benefits through tree preservation will help with filtration of the water that is being fed into the impaired Cuyahoga River watershed, which is a significant local recreation site for kayaking, swimming, and fishing. Beneficial use impairments of the Cuyahoga River include degradation of fish and wildlife populations, loss of fish habitat, and beach closings farther

downriver. Preservation of these sites will help to protect and promote overall watershed health.

SDG 11. Sustainable Cities and Communities. In the growing city of Kent, this project is an important part of equalizing health disparities and making the surrounding urbanized area more resilient to climate change. Tree preservation will benefit local residents by providing energy savings, cleaner air and water, and improved human health, contributing to the goal of making cities inclusive, safe, resilient, and sustainable. Local vulnerable populations include renters and residents who live in poverty.
