Social Impacts

City Forest Carbon Project
Social Impacts

UN Sustainable Development Goals

The 17 United Nations Sustainable Development Goals (SDGs) are an urgent call for action and global partnership among all countries, representing key benchmarks for creating a better world and environment for everyone. Well-designed and managed urban forests make significant contributions to the environmental sustainability, economic viability and livability of cities. They help mitigate climate change and natural disasters, reduce energy costs, poverty and malnutrition, and provide ecosystem services and public benefits. See more details in the CFC Carbon Project Social Impact Reference Guide.

Instructions

This template sets out all relevant SDGs and lists various urban forest project activities that fall within each SDG. Evaluate the SDGs to determine how your carbon project provides social impacts that may contribute towards achievement of the global goals. Check the box(es) that contain one of your project activities and describe in no fewer than two sentences how your project activities align with the corresponding SDG. On page 12, select the icon for three to five of the most relevant SDGs to your project and provide any additional information.

SDG 3 – Good Health and Well Being

Goal: Ensure healthy lives and promote well-being for all at all ages.

Examples of project activities include, but are not limited to:

- **X** Plant or protect trees to reduce or remove air pollutants
- ☐ If planting trees, select trees for reduced pollen counts and irritant production
- **X** Plant or protect trees to create shade, provide UV exposure protection, reduce extreme heat negative effects, and/or reduce temperatures to relieve urban heat effects
- ☐ Design project to buffer sounds, optimize biodiversity, or create nature experiences
- ☐ Locate project near vulnerable populations, such as children or elderly
- **X** Locate project near high volume roads to screen pollutants
- ☐ Locate project near people to encourage recreation, provide new parks or green space, or otherwise promote an active lifestyle
- ☐ Locate project near schools, elderly facilities, or mental health services to promote nature-based wellness, attention restoration, or other mental well-being
- ☐ Locate project in area with conditions of project-defined high inequity to trees, such as at schools, affordable or subsidized housing, formerly redlined neighborhoods, areas with high property vacancy rates, or area with high proportion of renters
- **X** Reduce stormwater runoff or improve infiltration rates
- ☐ Design project to reduce human exposure to specific pollutants or toxins
- ☐ Other

The trees planted through the Minneapolis Park and Recreation Board Planting Project 2022 were all planted in the City of Minneapolis, a very developed and impervious landscape. In addition to carbon sequestration, these trees provide other co-benefits to the urban core including the reduction of air pollution, urban heat effects and stormwater runoff. Most trees were planted as street trees, acting as a screen for particulate air pollution, specifically from traffic. These trees also increase the stormwater infiltration rate of the urban soils.

SDG 6 – Clean Water and Sanitation

Goal: Ensure availability and sustainable management of water and sanitation for all

Examples of project activities include, but are not limited to:

- ☐ Research and assess environmental injustices related to water in project area
- ☐ Locate project near high-traffic roads or to otherwise improve, mitigate, or remediate toxic landscapes near water
- ☐ Protect or plant trees to improve historically or culturally important sites related to water that have been degraded and/or neglected
- **X** Reduce stormwater by planting or protecting trees
- ☐ Plant forested buffers adjacent to streams, rivers, wetlands, or floodplains
- ☐ Prevent soil erosion by protect steep slopes
- **X** Improve infiltration rates
- ☐ Improve, mitigate, or remediate toxic landscapes and human exposure to risk
- ☐ Drought resistance, such as selecting appropriate water-efficient trees for project climate zone
- ☐ Other

The trees planted through the Minneapolis Park and Recreation Board Planting Project 2022 mitigate stormwater runoff and increase the infiltration rates of urban soils.

SDG 8 – Decent Work and Economic Growth

Goal: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

Examples of project activities include, but are not limited to:

- ☐ Community participation in project implementation, including such things as providing access to financial resources for ongoing community-based care
- ☐ Emphasize local hiring and support small businesses
- **X** Promote local economic opportunities through workforce training, career pathway development, or other employment
- ☐ Other

The expansion of the urban tree canopy through the Minneapolis Park and Recreation Board Planting Project 2022 will generate the need for an expanded environmental workforce to support the planting, auditing and maintenance of trees. Partners of this planting project are committed to supporting urban arborist workforce programs that focus on youth and young adults from our community, providing paid training opportunities and a pathway to sustainable, living wage jobs.

SDG 10 – Reduced Inequalities

Goal: Reduce inequalities within and among countries

Examples of project activities include, but are not limited to:

- ☐ Provide connections and cohesion for social health, such as create or reinforce places that promote informal interactions, engage local residents and users in tree management, include symbolic or cultural elements, or other events
- ☐ Research, understand, and design to address understand historic and current sociocultural inequities, community health conditions, environmental injustices, or prior local greening efforts in community
- ☐ Locate project near vulnerable populations, such as children or elderly, to provide air quality improvements or buffer against extreme heat effects
- ☐ Locate project in high-density residential areas or where there is a lack of trees to improve access and promote an active lifestyle
- ☐ Locate project near schools, elderly facilities, or mental health services to promote nature-based wellness, attention restoration, or other mental well-being
- **X** Locate project in area with conditions of project-defined high inequity to trees, such as at schools, affordable or subsidized housing, formerly redlined neighborhoods, areas with high property vacancy rates, or area with high proportion of renters
- ☐ Locate project near high-traffic roads or to otherwise improve, mitigate, or remediate toxic landscapes
- ☐ Protect or plant trees to improve historically or culturally important sites that have been degraded and/or neglected
- ☐ Community engagement in project design, including such things as engaging and respecting existing relationships and social networks, community cultural traditions, and public participation methods that are empowering and inclusive
- ☐ Community participation in project implementation, including such things as addressing and removing barriers to participation, promote ongoing community-based care and access to financial resources
- ☐ Emphasize local hiring and support small businesses
- ☐ Research and consider potential for gentrification and displacements
- **X** Promote local economic opportunities through workforce training, career pathway development, or other employment
- ☐ Other

The Minneapolis Park and Recreation Board Planting Project 2022 planted trees specifically in areas of limited tree coverage that have a high correlation with areas of concentrated poverty. These areas display the highest vulnerability to impacts from climate change and are in need of assistance in greening projects. The expansion of the urban tree canopy through this project will also generate the need for an expanded environmental workforce to support the planting, auditing and maintenance of trees. Partners of this planting project are committed to supporting urban arborist workforce programs that focus on youth and young adults from our community, providing paid training opportunities and a pathway to sustainable, living wage jobs.

SDG 11 – Sustainable Cities and Communities

Overall: Make cities inclusive, safe, resilient, and sustainable.

Examples of project activities include, but are not limited to:

- [x] Plant or protect trees to reduce or remove air pollutants
- [ ] If planting trees, select trees for reduced pollen counts and irritant production
- [x] Locate project near high volume roads to screen pollutants
- [ ] Locate project near vulnerable populations, such as children or elderly
- [x] Plant or protect trees to create shade, provide UV exposure protection, reduce extreme heat negative effects, and/or reduce temperatures to relieve urban heat effects
- [ ] Locate project near people to encourage recreation, provide new parks or green space, or otherwise promote an active lifestyle
- [ ] Design project to improve wellness and mental health, such as planting trees to buffer sounds, optimize biodiversity, optimize views from buildings, or create nature experiences
- [ ] Locate project near schools, elderly facilities, or mental health services to promote nature-based wellness, attention restoration, or other mental well-being
- [ ] Provide connections and cohesion for social health, such as create or reinforce places that promote informal interactions, engage local residents and users in tree management, include symbolic or cultural elements, or other events
- [ ] Research, understand, and design to address understand historic and current sociocultural inequities, community health conditions, environmental injustices, or prior local greening efforts in community
- [x] Locate project in area with conditions of project-defined high inequity to trees, such as at schools, affordable or subsidized housing, formerly redlined neighborhoods, areas with high property vacancy rates, or area with high proportion of renters
- [ ] Community engagement in project design, including such things as engaging and respecting existing relationships and social networks, community cultural traditions, and public participation methods that are empowering and inclusive
- [ ] Community participation in project implementation, including such things as addressing and removing barriers to participation, promote ongoing community-based care and access to financial resources
- [ ] Other

The trees planted through the Minneapolis Park and Recreation Board Planting Project 2022 were all planted in the City of Minneapolis, a very developed and impervious landscape. In addition to carbon sequestration, these trees provide other co-benefits to the urban core including the reduction of air pollution, urban heat effects and stormwater runoff. Most trees were planted as street trees, acting as a screen for particulate air pollution, specifically from traffic. These trees also increase the stormwater infiltration rate of the urban soils. Also, this project planted trees specifically in areas of limited tree coverage that have a high correlation with areas of concentrated poverty. These areas display the highest vulnerability to impacts from climate change and are in need of assistance in greening projects.

SDG 12 – Responsible Production and Consumption

Goal: Ensure sustainable consumption and production patterns

Examples of project activities include, but are not limited to:

- [x] Plant or protect trees to create shade or reduce temperatures to relieve urban heat effects
- [x] Provide cooling benefits and energy savings by shading impervious surfaces such as streets or parking lots, or planting trees on south and west sides of buildings
- [ ] Other

The trees planted through the Minneapolis Park and Recreation Board Planting Project 2022, in addition to carbon sequestration, will reduce urban heat effects. Most trees were planted as street trees and will shade homes and buildings, reducing heating and cooling costs over time.

SDG 13 – Climate Action

Goal: Take urgent action to combat climate change and its impacts.

Examples of project activities include, but are not limited to:

- **X** Plant or protect trees to reduce or remove air pollutants
- **X** Plant or protect trees to create shade or reduce temperatures to relieve urban heat effects
- ☐ Promote community capacity for social and climate resilience by engaging local residents or users in tree management, or other events to connect people to the project
- ☐ Reflect cultural traditions and inclusive engagement for climate resilience
- ☐ Design project to improve soil health
- **X** Provide cooling benefits and energy savings by shading impervious surfaces such as streets or parking lots, or planting trees on south and west sides of buildings
- **X** Plant or protect trees to reduce stormwater runoff
- ☐ Select water-efficient trees for climate zone and drought resistance
- **X** Create and/or enhance wildlife habitat
- ☐ Other

The trees planted through the Minneapolis Park and Recreation Board Planting Project 2022 were all planted in the City of Minneapolis, a very developed and impervious landscape. In addition to carbon sequestration, these trees provide other co-benefits to the urban core including the reduction of air pollution, urban heat effects and stormwater runoff. Most trees were planted as street trees and will shade homes and buildings, reducing heating and cooling costs over time. These trees also increase the stormwater infiltration rate of the urban soils and habitat diversity throughout the city.

SDG 14 – Life Below Water

Goal: Conserve and sustainably use the oceans, seas and marine resources for sustainable development.

Examples of project activities located in areas with marine ecosystems include, but are not limited to:

- ☐ Locate project near high-traffic roads or to otherwise improve, mitigate, or remediate toxic landscapes near water
- **X** Plant or protect trees in project areas to reduce stormwater runoff
- ☐ Plant forested buffers adjacent to streams, rivers, wetlands, or floodplains
- ☐ Prevent soil erosion into by protecting steep slopes
- **X** Improve infiltration rates
- ☐ Improve, mitigate, or remediate toxic landscapes and human exposure to risk
- ☐ Drought resistance, such as selecting appropriate water-efficient trees for project climate zone
- **X** Enhance wildlife habitat, such as riparian habitat for fish, birds, and other animals
- ☐ Other

The trees planted through the Minneapolis Park and Recreation Board Planting Project 2022, in addition to carbon sequestration, will reduce stormwater runoff. These trees also increase the stormwater infiltration rate of the urban soils and habitat diversity throughout the city.

SDG 15 – Life on Land

Goal: Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss.

Examples of project activities include, but are not limited to the following with increased functionality of green infrastructure:

- **X** Plant or protect trees to reduce stormwater runoff
- ☐ Select water-efficient trees for climate zone and drought resistance
- **X** Create and/or enhance wildlife habitat to improve local biodiversity
- ☐ Plant forested buffers adjacent to streams, rivers, wetlands, or floodplains
- ☐ Prevent soil erosion by protect steep slopes
- **X** Improve infiltration rates
- ☐ Other

The trees planted through the Minneapolis Park and Recreation Board Planting Project 2022, in addition to carbon sequestration, will reduce stormwater runoff. These trees also increase the stormwater infiltration rate of the urban soils and habitat diversity throughout the city.

SDG 17 – Partnerships for the Goals

Overall: Strengthen the means of implementation and revitalize the global partnership for sustainable development.

Examples of project activities include, but are not limited to:

- ☐ Promote community connections and capacity for social resilience by engaging local residents or users in tree management, or other events to connect people to the project
- ☐ Community engagement in project design, including such things as engaging and respecting existing relationships and social networks, community cultural traditions, and public participation methods that are empowering and inclusive
- ☐ Community participation in project implementation, including such things as addressing and removing barriers to participation, promote ongoing community-based care and access to financial resources
- ☐ Other

Summary of Project Social Impacts

The trees planted through the Minneapolis Park and Recreation Board Planting Project 2022 were all planted in the City of Minneapolis, a very developed and impervious landscape. In addition to carbon sequestration, these trees provide other co-benefits to the urban core including the reduction of air pollution, urban heat effects and stormwater runoff. Most trees were planted as street trees, acting as a screen for particulate air pollution, specifically from traffic. These trees also increase the stormwater infiltration rate of the urban soils.
